Next Meeting – September 9, 2008
THE SCENIC RED RIVER: A PHOTO ESSAY
BY HUBERT HERVEY

SEPTEMBER PROGRAM

When: Tuesday, September 9, 2008, 6:00 p.m.

Where: LSU in Shreveport Museum of Life Sciences

UPCOMING FIELD TRIPS AND EVENTS

10th ANNUAL HAYNESVILLE CELEBRATION OF BUTTERFLIES

Claiborne Parish Fairgrounds, Haynesville, LA
Saturday, September 13, 2008, 9:30 a.m. - Until
HCOB Director – Loice Kendrick-Lacy, 870-234-4910,
lklacy@magnolia-net.com

The day's activities will include several educational workshops, musical entertainment, and creative fun for kids. Admission is \$2 for adults; \$1 for children 6-18. The complete schedule is available on the festival website at:

www.claiborneone.org/haynesville/butterfly.html.

BSG ANNUAL HAWK WATCH AND BARBECUE

Hubert and Pat Hervey's Farm in Stonewall, Louisiana
Saturday, September 20, 2008, 9:00 a.m. - Until

Trip Leader – Hubert Hervey

hawkeyehub1@bellsouth.net, 925-9249

Coordinator – Nancy Menasco, nmcpa@aol.com, 868-3255

Bring binoculars, scope if you have one, lawn chair, hat, sunscreen, drinks. Lunch will be served around noon. Meat, plates, napkins, utensils, and condiments will be provided by the BSG. Please RSVP to Nancy Menasco by Thursday, September 18, if you're planning on joining us for lunch. Bring a side dish, salad, or dessert to share. If you find at the last minute that you will be able to attend, come on out; you won't go hungry.

How to get there: Go south on Linwood Road. Go a couple of miles into DeSoto Parish, pass a Quick Stop (not the name of it but the type of grocery store it is) on the left and turn right onto Ranchette Road. Go one mile, turn left at the T on Missile Base Road. Go almost a mile and turn left over the cattle guard that enters the farm. The sign says Hervey Dairy Road. The Hervey house is the first house on the left at the top of the hill.

BIRD STUDY GROUP PHONE NUMBERS AND MORE

Meetings.....Second Tuesday of each month, September through June, 6:00 p.m.

Next Meeting – October 14, 2008
A Motion Camera Survey of Northwestern Louisiana
MAC HARDY

OCTOBER PROGRAM

When: Tuesday, October 14, 2008, 6:00 p.m.

Where: LSU in Shreveport Museum of Life Sciences

Some results of a year-long motion camera project from southern Caddo Parish and northern DeSoto Parish will be presented. The main objective of the project was to locate any existing populations of the Ringtail (*Bassariscus astutus*) in our area. Many species of mammals and birds will be discussed.

UPCOMING FIELD TRIPS AND EVENTS

THE BIG SIT! AT THE RED RIVER NWR

Red River National Wildlife Refuge Headquarters Unit,
555 Sunflower Road, Bossier City, LA 71112

Sunday, October 12, 2008, Before Dawn 'til After Dark

Contact – Nancy Menasco, 868-3255, nmcpa@aol.com

RED RIVER NATIONAL WILDLIFE REFUGE
4th ANNUAL REFUGE CELEBRATION AND
CATFISH FRY

UPCOMING FIELD TRIPS AND EVENTS

by Nancy Menasco

Beginning birders are welcome on all field trips. Membership in the BSG is encouraged but is not required for participation in field trips. Field trips will **LEAVE** the designated meeting place at the time posted for each field trip. Plan to arrive early for field trip orientation and any carpooling/caravanning arrangements.

What to bring on field trips: binoculars, two-way radios, scope, if you have one, snacks, and drinks. Unless otherwise noted, field trips will take place rain or shine, so bring rain gear if the weather's threatening.

THE BIG SIT! AT THE RED RIVER NWR

Red River National Wildlife Refuge Headquarters Unit,
555 Sunflower Road, Bossier City, LA 71112
Sunday, October 12, 2008, Before Dawn 'til After Dark
Contact – Nancy Menasco, 868-3255, nmcpa@aol.com

This will be eighth straight year that BSG sitters will sit the Big Sit. This year, the Sit is moving to the Red River National Wildlife Refuge, where it will be the opening event to kickoff National Wildlife Refuge Week. Sitters count birds observed or heard from within a 17-foot diameter circle. The Big Sit officially begins at midnight and ends 24 hours later; BSG sitters have always been in the field by 6:30 a.m., manning the circle continuously until at least 7:30 p.m. Any Sitters wishing to man the circle before 6:30 a.m. will need to contact Nancy Menasco so we can make arrangements to let you in the gate. Sitters may come and go at will. Signs along the refuge road will lead you to the circle. Parking will be available near the circle.

Founded by the New Haven, Connecticut, Bird Club and now hosted by Bird Watcher's Digest magazine, the Big Sit is an annual, international, noncompetitive

birding event. It is sponsored nationally by Swarovski Optik, Alpen Optics, and Wild Bird Centers. 2008 will mark the 14th Annual Big Sit. From its beginnings as a strictly North American affair, the Big Sit has grown to include teams all over the world. Swarovski Optik donates \$500 to the team who gets the "Golden Bird." A bird species is selected by random drawing from all bird species sighted. All teams listing that species are entered in the random drawing for the Golden Bird. The winning circle then chooses a non-profit environmental-based organization to be the recipient of the \$500.

Directions to the refuge: From the intersection of US 71 (Barksdale Boulevard) and Jimmie Davis Highway (LA 511) in Bossier City, go south about one-half mile on US 71 and turn right (west) on Sunflower Road. Proceed to the end of the road to the refuge entrance. The refuge manager is Pat Stinson. The refuge phone number is 742-1219.

What to bring: binoculars, scope, field guides, chair, hat, mosquito repellent, sunscreen, drinks, breakfast, lunch, supper, snacks.

For more background on The Big Sit, go to <http://www.birdwatchersdigest.com/bigsit.html>.

RED RIVER NATIONAL WILDLIFE REFUGE 4th ANNUAL REFUGE CELEBRATION AND CATFISH FRY

Red River National Wildlife Refuge Headquarters Unit,
555 Sunflower Road, Bossier City, LA 71112
Saturday, October 18, 2008, 8:00 - 3:00 p.m.
Contact – Nancy Menasco, 868-3255, nmcpa@aol.com

Sponsored by the Red River Refuge Alliance (the Friends of the Red River National Wildlife Refuge) and the U.S. Fish and Wildlife Service, festival highlights include nature walks and refuge tours, hayrides, falconry demonstrations, live owls, baby alligators with photo opportunities for children, nature-related activities for adults and children, and a photography contest. New this year will be the "Bridges to Birding" activity stations sponsored by the Bird Study Group. Free shade-grown coffee, tea, juice, and breakfast bars will be available in the morning and a free catfish lunch with all the trimmings will be served at noon. There is no admission charge and the public is invited. More information and a schedule of activities is or will be available at the Friends website at: www.redriverrefugealliance.org.

Directions to the refuge: From the intersection of US 71 (Barksdale Boulevard) and Jimmie Davis Highway (LA 511) in Bossier City, go south about one-half mile on US 71 and turn right (west) on Sunflower Road.

Proceed to the end of the road to the refuge entrance. The refuge manager is Pat Stinson. The refuge phone number is 742-1219.

LOUISIANA ORNITHOLOGICAL SOCIETY FALL MEETING, LAFAYETTE, LA

Friday, October 24 – Sunday, October 26, 2008

As most of you know, LOS holds its spring and fall meetings in Cameron. Due to the devastation caused by Hurricane Ike, LOS will not be able to meet in Cameron this fall. Rather than cancel the meeting, it will be held in Lafayette. The Friday and Saturday night meetings will be held at the National Wetlands Research Center at 700 Cajundome Blvd. in Lafayette. There will be light refreshments on Friday night but you will be on your own for dinner Saturday night. There will be several field trip leaders available for Saturday but it will be on a very informal basis.

The program Friday night will be presented by Jane Patterson, Education Director for the Baton Rouge Audubon Society. Saturday night's keynote address will be "The National Wildlife Refuge System Birding Initiative - Why Refuges? Why Birds? Why Now?" presented by Dwight Cooley of the U.S. Fish and Wildlife Service. Dwight is Project Leader for the Wheeler National Wildlife Refuge Complex in northern Alabama.

The main hotel will be the Hilton Garden Inn (1-877-792-9444), which is very close to the Wetlands Center. Room rate will be \$98 with a LOS hospitality room available. Please ask for LOS room rate. Other options for less expensive accommodations will be provided.

When all the details are worked out, information and registration forms for the fall meeting will be available at the Louisiana Ornithological Society website at www.losbird.org/meeting.htm.

BAYOU BODCAU WILDLIFE MANAGEMENT AREA

Saturday, November 22, 2008, 8:00 a.m.

Trip Leader: John Dillon, (318) 243-2284, jdillon@webstersb.org

Meet at the U.S. Army Corps of Engineers' office near the dam at 8:00 a.m. We will bird in the area around the office for awhile so that we don't leave anyone behind.

Persons using WMAs for any purpose must possess one of the following: a valid Wild Louisiana Stamp, a valid Louisiana fishing license, or a valid Louisiana hunting license. Persons younger than 16 or older than 60 years of age are exempt from this requirement. Licenses may be purchased at most sporting goods stores, by calling the Louisiana Department of Wildlife

and Fisheries toll-free at 1-888-765-2602, or online at www.wlf.louisiana.gov.

Directions: From Shreveport or Bossier City, go east on I-20. At I-20 Exit 33 (Haughton/Fillmore), go left (north) on LA 157 a little less than 8 miles to Bellevue. At Bellevue, turn right on Bodcau Dam Road. Follow Bodcau Dam Road; it will go through the WMA Recreation Areas and across the spillway. The Corps office is located on the road that leads to your left on the far side of the dam. You can see the office and the Durden House from the Bodcau Dam Road. The trip takes about 45 minutes from southeast Shreveport.

WILD BIRD CENTER EVENTS

Beginner Bird Walks

Saturday, October 4, 2008, November 1 and 15, 8:00-10:00 a.m.

The Wild Bird Center conducts field trips the first and third Saturday of every month, weather permitting. Meet at the store in the University Place Shopping Center (also known as the Target Shopping Center) at the corner of Youree Drive and East 70th Street. Destinations vary according to local sightings and may include local parks, country roads, or a great backyard. Loaner binoculars are available. Join Dennis at the Red River National Wildlife Refuge Celebration on October 18.

For more information on any Wild Bird Center event, call Dennis or Janice Forshee at the Wild Bird Center, 318-797-BIRD (2473).

ALASKA BIRDING, ANCHORAGE, GAMBELL AND NOME, JUNE 2008

Jay V. Huner

Mike Musumeche and I participated in a Victor Emanuel Nature Tour (VENT) in June 2008 that took us from south Louisiana to Alaska. We arrived in Anchorage a day early and birded the next day with Dianne Toebe, a local birder we met through Birders' Exchange. We had a whorl wind tour of local birding sites in Anchorage picking up Barrow's Goldeneye, Pacific Loon, Red-throated Grebe, Hudsonian Godwit, Mew and Glaucous-winged Gulls, Arctic Tern, and Gray Jay. A special treat was a pair of American Dippers at a nest on a dam at the Elmendorf Air Force Base Salmon Hatchery.

Gambell

We met David Wolf and Louise Zemaitis, two of our VENT guides, and the rest of our group that evening. We left for Gambell via Nome mid-morning the next

day. Kevin Zimmer, our VENT leader, met us in Nome. Much to our surprise, we barely got settled at the Bering Air terminal in Nome before we boarded the relatively small twin-engine plane that accommodated the 17 of us and all of our food. Within an hour, we saw Gambell at the northern end of St. Lawrence Island and, about 40 miles to the west, the snow and ice covered mountains in Siberia.

One has to visit Eskimo villages to appreciate what greeted us. A number of Gambell residents drove their All Terrain Vehicles (ATVs) to the tarmac of the air strip as a form of recreation. Our luggage and food were loaded onto ATV carts and we were soon walking on the infamous Gambell gravel to the inn, a quarters building erected a few years ago for construction workers. It was warm and comfortable with warm showers but the best way to describe it as a place to stay was to call it "adequate."

Walking through gravel at a construction yard is child's play compared to walking in Gambell gravel. We passed racks of drying seal and walrus meat. We were cautioned to be discreet about taking pictures in the area as the Eskimo residents were concerned about perceived ridicule of their cultural ways. The homes and buildings were all simple in construction and elevated above ground level.

When we arrived, the sky was clear, the winds were mild, and the temperature was around 45 F. By early evening, the sky clouded and temperatures dropped into the 30's F with some very light snow and the wind picked up. We made a sea watch after walking through the Near Boneyard and seeing the ubiquitous Snow Buntings and Lapland Longspurs. We saw thousands of alcids flying to and from their nesting sites on the mountain that overlooks Gambell on the eastern side of the point jutting into the Arctic Ocean. Ducks, loons, gulls, murre, guillemots, auklets, and puffins were everywhere. Clouds of these birds swirled in the distance around the mountain.

The boneyards are the second feature after the Gambell gravel that folks encounter. The boneyards are middens where the residents, through the millennia, have left the bodies of their subsistence hunting culture food sources, whales, walruses, and seals. There are numerous holes in the boneyards where the residents dig for walrus ivory and artifacts. The vagrant Eurasian birds that draw birders to Gambell gravitate to the boneyards and find shelter and food in the holes. So, every time we went out, we went through a boneyard. There are three boneyards, the Near Boneyard between the village and the "airport", the Far Boneyard between the village and the mountain, and the Round Boneyard between the Far Boneyard and the village.

We had weather that ranged from heavy wet snow to heavy fog to bright, sunny calm, almost warm weather. Troutman Lake, just south of Gambell, was covered with ice during our 4 day stay. We had at least one day with all three forms of weather while at Gambell. However, there was no pack ice and we found no Ross's or Ivory Gulls.

Nasty weather kept the Gambell residents indoors and put birds on the ground. During nice weather, the young people had a very annoying habit of shooting at birds in the boneyards with air rifles and using 0.22 caliber rifles to practice marksmanship on birds swimming in the surf along the beach.

Our best birding day involved pretty heavy wet snow from dawn into mid-afternoon. That was the day we had Common Ringed-Plover, Gray-tailed Tattler, Rock Sandpiper, and Jack Snipe. Jack Snipe had been reported by birders who had been to Gambell the previous week but we found it only one day. The bird was so unique that it was a life bird for all three of our VENT guides. When we located it, we called Louise Zemaitis who came from the inn via ATV taxi. We closed in on the bird which held in a protected spot in the marsh on the north side of the Troutman Lake. It was hunkered down and we were able to watch it for about half an hour as it fed and rested. The golden highlights on the body and wings stood out against dark background feathers. Later, four of us walked to the south end of the lake and were greeted by a Gray-tailed Tattler, the only one seen well on the trip, feeding on stickleback minnows as close as 10 feet from us.

During sea watches special seabirds included Arctic and Yellow-billed Loons and Spectacled, King, and Stellar's Eiders. Harlequin and Long-tailed Ducks regularly flew past us on regular basis. It was amusing to see most flocks of murre being led by one or more puffins. There were so many murre and enough guillemots that we left Gambell being able to separate Common and Thick-billed Murre and Black and Pigeon Guillemots with ease. One sea watch generated our only Dovekie of the trip flying near enough the beach to easily pick up its field marks.

Our last day on Gambell emphasized the iffy nature of visits there. We were to leave at 10:30 AM but the fog was so thick that the plane could not land. Several of us went to the Far Boneyard and walked across the gravel to the base of the mountain. We passed the marsh on the north side of the lake and saw unique Long-tailed Jaeger behavior. A pair was flying along sharing vole parts in mid-air. Shortly thereafter we watched a lone jaeger catching and dispatching another vole. Our group was able to get up close views of various auklets that were low on the mountain and unwilling to fly out to feed

because of the heavy fog. As we walked back to the inn, we got a call on our radio to let us know that a plane was on the landing strip at St. Lawrence Island's other village and could take 7 of us to Nome within the next hour. So, we picked up our pace in the unforgiving gravel.

While we had a quick lunch, we drew tabs to see who got to go to Nome. I was one of the lottery winners and was able to enjoy a nice room at the motel in Nome by mid-afternoon. Fortunately, the plane that took me to Nome was able to turn around immediately and recover the rest of our group so everyone had a very comfortable night. However, there was no guarantee that any of us would have gotten away from Gambell that day or for a few days afterwards!

Nome

Nome was hardly a thriving metropolis but it has three roads that go 60-70 miles out into the hinterland allowing marsh, estuary, bay and seaside, tundra, and mountain birding. We were even able to reach the end of the Council Road where the "Tundra Meets the Taiga."

Nome is billed as the Ivory Capitol of Alaska and was the Gold Capitol of the state in years past. Mining equipment and abandoned gold dredges are found all around Nome and outlying area. The railroad to nowhere complete with rusting locomotives and rolling stock lay in a marsh along the Council Road. Small one or two man floating dredges are found along the beach front where entrepreneurs continue to mine for gold in the shallow waters there. We also learned a bit of trivia about the legendary western lawman Wyatt Earp who completed his long career in Nome!

We had two full days in Nome. Our first day started with heavy, wet snow fall and we set out along the Kougarok Road with very little to be seen through foggy van windows and near white out conditions within 50 yards of the road. But, by the time we had traveled about 45 minutes, we were out of the snow and into clearing conditions. We were able to view a female Gyrfalcon on a nest as the clouds lifted. Several Willow Ptarmigans were encountered and we also found a very cooperative Rock Ptarmigan gave us wonderful views. We were also treated to calling and displaying Willow Warblers and Bluethroats. At another stop we had Say's Phoebe, Surf-bird, and American Tree and Golden-crowned Sparrows. We stopped in a boggy area for lunch and located a female Goshawk on a nest and later watched a Gyrfalcon flying nearby.

After lunch, we finally arrived at Coffee Dome and started our trek up adjacent Curlew Dome to seek the Bristle-thighed Curlew, the rarest shorebird in North America. We were given a thorough briefing on

separating Whimbrel from Bristle-thighed Curlew and advised that it was important to not only watch our footing but watch out for Grizzly Bears. The sky was clear, there was little breeze, and we quickly started shedding heavy outer ware! Within a short time, a large shorebird was spotted. And, we got a great field lesson about why we were viewing a Whimbrel so we could separate it from our real quarry. After about 45 minutes, we were spread out hoping to locate a bird that often seeks shade in scrub willow in the mountainside tundra when it is clear and "hot." Fortunately, a curlew appeared at the end of the line near a cove of willows. Over the next 30-40 minutes, everyone got really good views of the curlew and we even got to within 30 yards of the bird. What a treat!

After we got back to the vans, it took a couple of hours to get back to Nome with some stops along the way that generated two Northern Shrikes and a Golden Eagle on a nest. Triangular-shaped snow plow guides were found at regular intervals along all of Nome's roads and we had a really good view of a resting Long-tailed Jaeger resting less than 5 yards from our vans.

The next day we were off along the coast on the Council Road and made several stops at inlets where streams entered the bay. Slaty-backed Gull was a lifer for a number of folks at our first stop.

Our next stop at another inlet generated my last lifer for the trip, Red-necked Stint. It is a good thing we had guides as many of us, me included, might have passed the bird off as just another peep.

Cape Nome was a granite promontory extending into the sea. We had excellent views of Harlequin Duck, Black and White-winged Scoters, and Pelagic Cormorants.

We had good views of breeding waterfowl in the marshy estuary inland from the coastal road as we proceeded south. It was a good thing we had two vans as the trailing van picked up several distant geese feeding with a flock of Brant that turned out to be several Emperor Geese. And, during one stop, a single Yellow-billed Loon flew by near enough and slow enough to give everyone a great view, much better than the views we had at Gambell, of this hard to find bird.

Around 4 PM, we finally got to the end of the road at Council City. The spruce forest harbored nesting Bohemian Waxwings and we got excellent views of birds that responded, after a bit of work, to tapes. We heard at least two Varied Thrushes calling away from the road but never managed to see one. Yellow, Yellow-rumped, Blackpoll and Wilson's Warblers were present in the forest habitat along with Gray Jays.

We started back to Nome and found both Northern Wheatear in hill side habitat and a Black Turnstone in

the marsh. We passed thousands of waterfowl including many Common Eiders.

The next and final morning, we made a trip on the northeast side of Nome. We missed Ring-necked Duck and Rusty Blackbird, both of which would have been trip birds and one, the Rusty Blackbird, would have been a lifer for one member of our party. But, we missed both birds. A male dipper entertained us with quite a song melody. An Orange-crowned Warbler was a trip bird and put on a display on a power line.

We left Nome in early afternoon for Anchorage. That ended our birding in Alaska but not our memories.

Mammals

Mammals are a bit difficult to see because they are often cryptic. But, at Gambell, we saw Gray Whale, Arctic Fox, Tundra Vole, and Short-tailed Ground Squirrel (also called Low Brush Grizzly!). Around Nome, we had Moose, Musk Ox (an introduced species), Red Fox, Arctic Hare, and Short-tailed Ground Squirrel. We were on the alert for Grizzly Bears but never saw the first one and were not especially disappointed that we were not disturbed while birding on Curlew Mound!

Unique Alaskan Birds – Life Birds in Bold – Anchorage (A), Gambell (G) and Nome (N) June 2008

Minutes of the Regular Meeting
June 10, 2008, 6:30 p.m.
Museum of Life Sciences at LSUS

Program—Clyde Massey took a two week birding tour of Panama with Victor Emanuel Nature Tours. He discussed his trip and the birds he saw. He also showed a video of the birds of Panama made by Bill Wayman from New Orleans who was also a participant in tour.

Refreshments—Amanda Lewis was not at the meeting, so Jim Ingold conducted the meeting in her place. He said that Jean Trahan was so kind as to provide refreshments for this meeting. He also passed a signup sheet around so that members could volunteer to take responsibility for refreshments at meetings for the year beginning in September.

Officers—Jim Ingold reported that the board of directors has selected the following new officers: Jim Ingold (President), Mac Hardy (Vice President), Jeff Trahan (Secretary), and Jean Trahan (Treasurer). Jim also said that John Dillon has volunteered to be the field trip coordinator in place of Nancy Menasco.

Field Trips—Nancy Menasco said that there is only one field trip scheduled. It is the NABA 4th of July Butterfly on June 15. Jeff Trahan is the leader.

Kroger Cards—Jim Ingold said that the current Kroger Cards from the Bird Study Group that you present at Kroger stores are no longer valid. They will be replaced in the near future with a different system.

Chimney Swift Counts—Linda Adrion spoke for ME Lewis who could not be present. She said that ME thinks that the club should participate in the annual **Chimney Swift Counts**. Apparently no one from northern Louisiana has been doing this.

RRNWR—Nancy Menasco Said that the Red River National Wildlife Refuge celebration will take place October 18 and that the club has agreed to sponsor stations at the celebration to provide information about birds and birding.

Bird Talk—Jim Ingold reported a **Grasshopper Sparrow** at the sod farm on Sentell Road. He also saw a **Broad-winged Hawk** in Bienville Parish.

Minutes of the Regular Meeting
September 9, 2008, 6:30 p.m.
Museum of Life Sciences at LSUS
Program—Hubert Hervey presented a slide show of photos taken on the Red River. The photos were all taken by Ronnie Maum.

Field Trips—John Dillon reported on upcoming field trips. The annual hawk watch will take place September 20, at Hubert Hervey's farm. The Big Sit is scheduled for October 12 at a location of Nancy Menasco's choosing. Finally, the Haynesville Butterfly Festival will be September 13 at Haynesville, LA.

Refreshments—Amanda Lewis said reported that Pat Lonnecker, Shirey Huss, and Linda Adrion provided refreshments for this meeting. Silviera Hunt will provide refreshments at the next meeting.

Treasurer's Report -- Jean Trahan reported that on August 31, the club had \$5,486.35 in the bank. In addition we had \$201.63 and \$793.84 in prepaid expenses at the post office and LSUS printing, respectively. The fund balance is \$6,481.82.

Membership—Mac Hardy said that the club has somewhat over 100 paid members.

Newsletter—Mac Hardy said that the recent newsletter was not printed in the regular manner since the printing office of LSUS was closed on account of the recent hurricane. So that issue of the newsletter was only one page.

Programs—Mac Hardy reported that John Dillon will present the next program.

Miscellaneous—Nancy Menasco said that Jerry Bertrand will be the chef at the upcoming hawk watch on September 20. She also asked if anyone would be interested in doing a shorebird count on the Red River Refuge during the upcoming weekend. If so, contact her. Nancy also said that she would like to change the location of the Big Sit because the location that we have been using has become much less interesting due to habitat change. Nancy will pick a location and tell everyone where it will take place. Nancy reminded everyone that the Red River Refuge Wildlife Celebration will occur in October and that the club has promised to set up stations to explain birds and birding.

Financial Support—Larry Raymond said that he would like to see the club be a financial sponsor for the Region

6 National Association for Interpretation. It will take place approximately February 1, 2009. It was noted that the club has done this in the past.

Bickham Dickson Park—Amanda Lewis reported that the Mathew Campbell Memorial Bird Walk is completed. There are 10 signs that show pictures and information about species of birds and the trailhead sign in the back of Bickham Dickson Park. The project was an Eagle Scout project for scout Tristan Davey

Bird Talk—John Dillon had an early **Ruby-crowned Kinglet** at Caney Lake. Terry Davis reported a **Magnificent Frigatebird** and a **Brown Pelican** at Lock & Dam #5 on the Red River. He believes that these birds are vagrants brought in by the recent hurricane. Terry also said that Charlie Lyon saw **Sooty Terns** and a **Laughing Gull** on Cross Lake. Jerry Bertrand reported many **Swallow-tailed Kites** at the Lower Cane Unit of the Red River Refuge about month ago. Bill Hall saw 30 to 40 **Common Nighthawks** on Youree Drive between Kings Highway and Ockley. Velda Nielson said that she had a **Baltimore Oriole** at her house.

MINUTES OF THE BOARD MEETING

June 3, 2008

Museum of Life Sciences at LSUS

Board members participating in the meeting were Mac Hardy, Jeff Trahan, Jean Trahan, Nancy Menasco, Amanda Lewis, Jim Ingold, Jerry Bertrand, Hubert Hervey, Rosemary Seidler, and Silvieira Hunt.

Treasurer's Report—Jean Trahan reported that for the month ending May 31, 2008, the club had \$5,766.27 in the bank. In addition, we had \$252.95 and \$452.54 in prepaid expenses at the post office and LSUS printing, respectively. The fund balance is \$6,471.76. Jean also reported that the club made five donations of \$100.00 to each of the following organizations: Baton Rouge Audubon Society (for use at Peveto Woods), Walter B. Jacobs Nature Park, Minden High School Nature Club, Caroline Dorman Nature Preserve, and the Ouachita Mountain Biological Station.

Kroger Cards—Mac said that he has received the forms for the new system of Kroger cards and he will submit them to Kroger. They will issue a specific bar code that the club can print.

Non-profit Status—Nancy Menasco asked if the club had filed the postcard return for the club's 501(c)(3) status. She said that every 501(c)(3) organization must

file this card. Mac Hardy took the responsibility of submitting the necessary information.

Remote for Computer—Jim Ingold said that the club should acquire a remote wireless presenter with laser pointer to be used for power point presentations. The cost of the remote is in the neighborhood of \$50.00. The device would facilitate power point presentations and make it easier for the speaker to deliver the presentation. A motion was made to approve the purchase of the remote. The motion was seconded and approved. Jim will purchase the device.

New Officers—New officers for the following year were discussed. The following slate of officers was proposed: Jim Ingold (president), Mac Hardy (vice president), Jeff Trahan (secretary), and Jean Trahan (treasurer). A motion was made to approve the nominations. The motion was seconded and approved.

Newsletter—Jim Ingold said that he does not want to edit the newsletter any longer.

Suggestions—Nancy Menasco said that the Louisiana Department of Culture, Recreation, and Tourism has grants to give for nature festivals. A Purple Martin festival was suggested and discussed at the previous board meeting. A suggestion was made that the festival could be held next summer when the Purple Martins are present downtown. Grant deadlines from the state should be consulted. Nancy displayed a book called "Flying Wild—An Educator's Guide to Celebrating Birds." This is a book teachers could use to teach about birds and bird knowledge. The club might encourage teachers to do this. It was also suggested that we put a list of possible science fair projects concerning birds on the club's website. Nancy said that she would get a list of projects and get it on the site.

Red River Alliance—Nancy Menasco said that the alliance is beginning to plan for the October Celebration of the Red River National Wildlife Refuge. She suggested that the BSG should set up booths at the celebration to help people learn about birds and birding. This could be thought of as a birding outreach field trip. Nancy said that she has a book called "Bridges to Birding" that explains how to do this. Mac Hardy moved that the BSG help at the Celebration of the Red River National Wildlife Refuge. The motion was approved. The celebration will take place October 18.

BIRD REPORT – compiled October 2, 2008

Use the bird report to see what other birders have been seeing and where to go find the bird you want to see. Observers are abbreviated by the first and last initials. Dates and localities of observations are summarized under the observer's initials. Sightings are arranged by species. Following each species is a line of data in the following format: date, initials of the observer, number of birds observed, initials of another observer, number of birds they observed, etc. For the number of birds observed, a 1 is used for both 1 bird and for numbers not reported by the observer. For example: 01/12/99 BB 2 means that on January 12, 1999, BB saw two birds. Then by looking on the observer list, located after the sightings, you can determine that BB is Bob Birder and on 1/12/99 he was birding C. Bickham Dickson Park.

Report bird records for the newsletter to Mac Hardy by the 15th of each month. All bird records reported here are observations of the observers and are therefore the responsibility of the observer.

November 6, 2008

Next Meeting – November 11, 2008
Six Weeks in Colorado
JOHN DILLON

NOVEMBER PROGRAM

When: Tuesday, November 11, 2008, 6:00 p.m.
Where: LSU in Shreveport Museum of Life Sciences

John Dillon will be our speaker and he will talk about his summer of birding and nature watching in Colorado this summer.

UPCOMING FIELD TRIPS AND EVENTS

BAYOU BODCAU WILDLIFE MANAGEMENT AREA

Saturday, November 22, 2008, 8:00 a.m.
Trip Leader: John Dillon (318) 243-2284
jdillon@websterpsb.org

WINTER/CHRISTMAS BIRD COUNTS:

CADDO LAKE WINTER WARM-UP BIRD COUNT

Saturday, December 6, 2008
Compiler – Dorothy Metzler of Northeast Texas Field Ornithologists (NETFO)
Louisiana Coordinator – Jim Ingold, 797-5236 (W), 742-5067 (H), james.ingold@lsus.edu

CLAIBORNE CHRISTMAS BIRD COUNT

Tuesday, December 16, 2008

Compilers–Nancy Menasco, nmcpa@aol.com, 868-3255, and Mary Ellen (M.E.) Lewis, 318-927-9280, melewis180@aol.com

SHREVEPORT CHRISTMAS BIRD COUNT

Saturday, December 20, 2008

Compiler – Charlie Lyon, 865-2674 (H), 222-8421 (W), lyon5516@bellsouth.net

NATCHITOCHE CHRISTMAS BIRD COUNT

Saturday, December 27, 2008

Compiler – Charlie Lyon, 865-2674 (H), 222-8421 (W), lyon5516@bellsouth.net

BOSSIER – CADDO - BIENVILLE CHRISTMAS BIRD COUNT (BCBCBC)

Saturday, January 4, 2009

Compiler – Paul Dickson, 797-7900 (W), 798-1000 (H), Paul@morrisdickson.com

WILD BIRD CENTER EVENTS

Beginner Bird Walks

There will be no Saturday bird walks during December.

UPCOMING FIELD TRIPS AND EVENTS

By John Dillon

Beginning birders are welcome on all field trips. Membership in the BSG is encouraged but is not required for participation in field trips. Field trips will **LEAVE** the designated meeting place at the time posted for each field trip. Plan to arrive early for field trip orientation and any carpooling or caravanning arrangements.

What to bring on field trips: binoculars, two-way radios, scope, if you have one, snacks, and drinks. Unless otherwise noted, field trips will take place rain or shine, so bring rain gear if the weather's threatening.

BAYOU BODCAU WILDLIFE MANAGEMENT AREA

Saturday, November 22, 2008, 8:00 a.m.

Trip Leader: John Dillon (318) 243-2284
jdillon@websterpsb.org

Meet at the U.S. Army Corps of Engineers' office near the dam at 8:00 a.m. We will bird in the area around the office for a while so that we don't leave anyone behind.

Bodcau WMA has a variety of habitat from bottomland hardwood swamp to dry, grassy fields and thickets. The locations we will bird will be dependent on weather and accessibility. Possible birds of interest or specialty birds include: Blue-winged Teal, Hooded Merganser, Wild Turkey, Barred Owl, White-breasted Nuthatch, Sedge Wren, and a variety of sparrows including Bachman's (difficult in winter but present), Field, Henslow's (rare), LeConte's, Fox, and Lincoln's.

Persons using WMAs for any purpose must possess one of the following: a valid Wild Louisiana Stamp, a valid Louisiana fishing license, or a valid Louisiana hunting license. Persons younger than 16 or older than 60 years of age are exempt from this requirement. Licenses may be purchased at most sporting goods stores or by calling the Louisiana Department of Wildlife and Fisheries toll-free at 1-888-765-2602 or contacting them online at www.wlf.louisiana.gov.

Directions: From Shreveport or Bossier City, go east on I-20. At I-20 Exit 33 (Haughton/Fillmore), go left (north) on LA 157 a little less than 8 miles to Bellevue. At Bellevue, turn right on Bodcau Dam Road. Follow Bodcau Dam Road; it will go through the WMA Recreation Areas and across the spillway. The Corps office is located on the road that leads to your left on the far side of the dam. You can see the office and the Durden House from Bodcau Dam Road. The trip takes about 45 minutes from Southeast Shreveport.

WINTER/CHRISTMAS BIRD COUNTS:

Contact the compiler listed below for each count or sign up at a BSG meeting. Participants will be assigned an area or teamed with other birders. Beginning birders are encouraged to participate. Bird counts are fun and a great way to see and learn to identify lots of birds with the assistance of seasoned birders.

CADDO LAKE WINTER WARM-UP BIRD COUNT

Saturday, December 6, 2008

Compiler – Dorothy Metzler of Northeast Texas Field Ornithologists (NETFO)

Louisiana Coordinator – Jim Ingold, 797-5236 (W), 742-5067 (H), james.ingold@lsus.edu

The BSG will once again count birds in the Louisiana portion of the circle. Participants will meet at a Metzler's Caddo Lake house in Uncertain, Texas for supper and to call the list. If you are unable to attend, you may meet Jim at Horace Downs Park near the Caddo Lake Dam around 4:00 p.m. to turn in your list.

CLAIBORNE CHRISTMAS BIRD COUNT

Tuesday, December 16, 2008

Compilers–Nancy Menasco, nmcpa@aol.com, 868-3255, and Mary Ellen (M.E.) Lewis, 318-927-9280, melewis180@aol.com

Participants will meet at the home of M.E. and Fred Lewis on Lake Claiborne for supper and to call the list.

Contact Nancy or M.E. for information in regard to lodging for Monday and/or Tuesday night. Most of the free lodging is already reserved, but there *may* be something available. Lake Claiborne State Park (1-877-226-7652) also has very nice cabins available at \$65 per night.

SHREVEPORT CHRISTMAS BIRD COUNT

Saturday, December 20, 2008

Compiler – Charlie Lyon, 865-2674 (H), 222-8421 (W), lyon5516@bellsouth.net

Participants in this count, the oldest continuously run count in Louisiana; we will meet at a to-be-determined location for supper and to call the list.

NATCHITOCHEES CHRISTMAS BIRD COUNT

Saturday, December 27, 2008

Compiler – Charlie Lyon, 865-2674 (H), 222-8421 (W), lyon5516@bellsouth.net
Details TBA.

BOSSIER – CADDO - BIENVILLE CHRISTMAS BIRD COUNT (BCBCBC)

Saturday, January 4, 2009

Compiler – Paul Dickson, 797-7900 (W), 798-1000 (H), Paul@morrisdickson.com

Participants will meet at Paul Dickson's home at 10455 Ellerbe Road (across from Holy Angels) for supper and to call the list.

WILD BIRD CENTER EVENTS

Beginner Bird Walks

There will be no Saturday bird walks during December.

For more information on any Wild Bird Center event, call Dennis or Janice Forshee at the Wild Bird Center, 318-797-BIRD (2473).

LEAST TERNS THROUGH THE YEARS

By Hubert Hervey

I am curious to understand how much damage is done to **Least Terns** that miss an entire year of nesting along an entire ecosystem like the Red River. That is what happened during 2007. For emphasis: Not a tern was able to nest because of extreme rain and high water events extending farther west even than Lake Texoma. What number of adult **Least Terns** returned this year

compared to previous years? I do not have sufficient data to compare for 2006, so for this comparison to be valid, I will have to compare 2008 to 2005. To be sure we are comparing apples to apples; I guarantee the total count covers 278 river miles each year from Alexandria LA to Index AR. Arkansas claims 93 miles and Louisiana has 185 miles.

In 2005 my **Least Tern** totals in Arkansas show 452
In 2005 my **Least Tern** totals in Louisiana are 208
The two state total for 278 river miles is 660

In 2008 my **Least Tern** totals in Arkansas show 232
In 2008 my **Least Tern** totals in Louisiana are 229
The two state totals for 278 river miles is 461

Analysis:

The full extent of the loss is 30 % of the population!
We actually had more adult **Least Terns** in Louisiana in 2008 than in 2005. Why?

The reason is because high water last summer, winter and spring created a few new sandbars in the Pool stages and more birds attempted to raise families here. The upriver colonies were in the best condition I have ever seen for terns to nest.

Were they successful?

As shown in the previous article, they were not as successful as one would expect!.

The Louisiana colonies raised 70, with 10 more possible.
The Arkansas colonies raised 91, with 48 more possible.

Implications:

Next year the newly created areas in the Pool stage will be vegetated almost entirely and fewer birds will attempt to nest in areas South of Shreveport unless some habitat management occurs.

Next year the improved habitat in the free-flowing portions of the river will still be especially acceptable to nesting least terns, and there will be a few more to take advantage of those improved conditions.

LEAST TERNS ON THE RED RIVER IN 2008

By Hubert Hervey

This report summarizes twelve trips on the Red River in both Arkansas and Louisiana from north of Texarkana to Alexandria during the summer of 2008. After the complete failure of any terns to nest in 2007 due to a hundred year rain event and high water event all summer

long, the year 2008 gave the birds a chance to rebound. This year was a good year for the terns. 229 adult **Least Terns** returned to Louisiana and raised 70 birds to fledglings, with a potential for 9 more from eggs and chicks. In Arkansas 232 adult birds returned and raised 91 to fledglings with 8 unfledged chicks, 20 nests, and 40 eggs yet to be added to that number. Arkansas is doing much better than Louisiana with almost the identical number of adults present.

The high water of last summer abated temporarily during the fall, and resumed during February to May, lowering in mid-May enough to allow the terns to find ideal sandy islands, clean of nearly all vegetation over all of the free-flowing range of the river North of Shreveport. A different situation existed in the five pool stages of the river from Shreveport South where a few islands emerged above pool level, showed enough low-level sandy characteristics to encourage the birds to attempt to nest and then grassed over rapidly, causing nesting failure in most places. The worst example was in Shaw Lake Area of Pool 5, just north of Bishop's Point where on the initial survey in June, 50 Least Terns were attempting to nest. This number decreased, as birds gave up on the deteriorating circumstances and sought suitable habitat upriver. Finally 14 adult birds were able to hatch 4 eggs and raise those four chicks to fledglings. I estimate that less than half of the original 50 left in time to successfully nest at other locations, judging by increased numbers in the successful colonies of Benton (a brand new location), Glycerine (where the threat of a gravel mine exists) and Hosston (visible from the LA 2 Bridge).

New potential enemies of **Least Terns** have made their presence known. On a canoe trip with Jack Land in 2006 we saw a cougar on the river in Arkansas, at a sweep of river formerly known as Panther Bend. Will a cougar bother a **Least Tern** if he can't catch a beaver? On an Island evaluation trip at the end of October, 2007 with Rob Wiley, a wildlife contractor from Ohio, we found bear tracks crossing Clipper Revetment sandbar in Arkansas. Will a bear stop to tear up a **Least Tern** colony if he can't find a bee tree? .

In Louisiana at Scott's Slough on the Red River on July 8, 2008 I watched as a week old tern chick ran across the hot sand. Through binoculars I watched as a **Scissor-tailed Flycatcher** left its mid-island perch on a solitary snag, and attacked the fuzzy chick, hitting it while in flight, sending it tumbling. In a split second the adult **Least Tern** attacked from above and sent the Scissor-tailed flycatcher hastening away, minus a few feathers,

and looking for a safer meal. This incident suggests to me the near certainty that this bird had learned to make a meal of very young **Least Terns**. There were certainly no other potential food items on the barren island for the predatory flycatcher to consider eating. So as beautiful as **Scissor-tailed Flycatchers** are to behold, I have lost some of my admiration for them.

The Annual 2008 Yellow Rail Drag, Red Slough Wildlife Management Area, Oklahoma

By Jay V. Huner

High on most birder's to find list is the cryptic Yellow Rail. Even though these beautiful rails are large enough to see, they are rarely seen because they blend perfectly with their backgrounds and rarely flush. Yellow Rails are more often heard than seen and have a very distinctive Morse code sounding call. I have heard individual birds in Louisiana and North Dakota but never seen one.

The Red Slough Wildlife Management Area is located just north of the Red River off US 259 about 18 miles south of Idabel in southeastern Oklahoma. For some years now, I have wanted to make a trip to the site to see how this large area of impoundments is managed for waterbird but never had the time to go. I was particularly interested in the widely reported annual early October Yellow Rail Drags conducted by David Arbour. Well, this year, high gas prices be danged, I decided to go and had a wonderful, productive birding visit to the area.

Red Slough WMA is situated about 2 ½ hours from Shreveport with the best route being I-12 to Longview, Texas and US 259 north to the Idabel, Oklahoma area. Immediately north of the Texas-Oklahoma border, OK Route 87 intersects US 259. Go east about 3 miles and intersect Mudline Road on the left at a Getty Oil sign. Go north on Mudline Road and in less than a mile, you are on the WMA. There are three parking pull outs equally spaced from the south border to the north border of the WMA. A dozen avid birders met David Arbour at the middle turn out about 9 AM on a beautiful, cloudless, calm Sunday morning.

After a quick search for a King Rail that had been seen nearby, we motored to the western area of the WMA to Paschal Lane and met Berlin Heck who was waiting with a "rail drag". The rail drag was a stout rope with cola bottles filled with gravel attached every three feet. David explained that we would pull the drag back and forth in the adjacent field to flush rails. Several of us

followed about five feet behind the drag to make sure that rails not flushed by the drag would not elude us. The dry grass was about knee high. David advised us to be especially attentive to areas with a yellow colored grass. On the second pass, a **Yellow Rail** popped up. It immediately dived ahead of us about 15 feet in front of the drag. We surrounded the area and converged carefully shuffling our feet to keep from hurting the bird. Sure enough, the bird was very nearly stepped on before it popped up again. It was invisible even though the cover was quite open. Talk about a great look as it posed quite still. Then it flushed and flew providing even better looks. We found it again before it flew some distance away.

We managed a total of three different **Yellow Rails** before we called it quits to visit the various impoundments to search for shorebirds, waders, waterfowl and whatever else could be found. We constantly flushed **Leconte's Sparrows** in the field and often saw **Sedge Wrens**. Near a brushy area a Vesper Sparrow posed for us.

Once we left the rail field, we visited various WMA impoundments and picked up some really interesting birds for the site including **American Avocet**, **Bald Eagle**, **Canvasback**, **Virginia Rail**, and **Nelson's Sharp-tailed Sparrow**. I found it a bit humorous, coming from south-central Louisiana to participate in a very serious search for an alligator! We did not find anyigators but did pass a nest site which was the first documented, successful alligator nest in Oklahoma.

I had visited some of the reservoirs at the north end of the WMA prior to the assembly time for the rail drag. The WMA is closed to visitors other than organized hunts from mid-October to the end of January but we were able to visit the area thanks to David's scheduled rail drag event. I found a number of waterfowl and song birds in the nearby riparian area during that early morning search. Birds very rare to the area included a single Neotropic Cormorant and a flock of 15 Black-bellied Whistling-Ducks that included 4 adults and 11 young birds.

I am a gung ho "lister" and my overnight trip to Oklahoma allowed me to generate an Oklahoma State List and add two year birds to my 2008 list – **Yellow Rail** and **Nelson's Sharp-tailed Sparrow**. My list for my Red Slough WMA trip follows. Others in the group recorded the following birds that I missed: **Northern Pintail**, **Roseate Spoonbill**, **Sora**, and **Common Moorhen**.

Black-bellied Whistling-Duck – 15
 Wood Duck – 30
 Gadwall – 400
 American Wigeon – 15
 Mallard – 30
 Blue-winged Teal – 75
 Northern Shoveler – 5
 Green-winged Teal – 40
 Canvasback – 3
 Ring-necked Duck – 15
 Pied-billed Grebe – 2
 American White Pelican – 1
 Neotropic Cormorant – 1
 Double-crested Cormorant – 300
 Great Blue Heron – 6
 Great Egret – 30
 Black-crowned Night-Heron – 3
 Dark Ibis – 3 [David said that both species are present as well as hybrids.]
 Black Vulture – 2
 Turkey Vulture – 20
 Bald Eagle – 1
 Northern Harrier – 3
 Cooper's Hawk – 1
 Red-shouldered Hawk – 1
 Red-tailed Hawk – 3
 American Kestrel – 1
 Yellow Rail – 3
 King Rail – 2
 Virginia Rail – 1
 American Coot – 800
 Killdeer – 15
 American Avocet – 2
 Greater Yellowlegs – 35
 Least Sandpiper – 15
 Long-billed Dowitcher – 40
 Wilson's Snipe – 20
 Mourning Dove – 2
 Belted Kingfisher – 2
 Red-bellied Woodpecker – 3
 Downy Woodpecker – 1
 Northern Flicker – 2
 Pileated Woodpecker – 1
 Eastern Phoebe – 10

 Eastern Meadowlark – 6
 Common Grackle – 3

More information about Red Slough WMA can be secured by search the World Wide Web for the location. Of interest to readers are plans for a birding festival at Idabel the first weekend in May 2009. Red Slough WMA will be a featured destination for the festival.

The Working Wetlands Conservation Initiative

By Jay Huner

Background:

Working agricultural lands in the southern United States and California, primarily rice and/or crawfish farming, contribute significantly to the habitat requirements of migrating waterfowl and other wetland-dependent wildlife. For example, of the estimated six million birds wintering in Southern Louisiana, 75 percent of the habitat is provided on the crop producing land along the Gulf Coast. The remaining 25 percent is supplied by the marsh habitats along the Gulf. Similarly, agricultural production in the Central Valley of California is critical to wintering bird populations.

Millions of other waterbirds including waders, shorebirds, gulls, terns, rails, moorhens, gallinules, coots, gulls and terns benefit from working wetland habitat. The working wetlands in southern Louisiana and southeastern Texas are invaluable habitat as the result of the integration of crawfish within the rice landscape. This ensures that moist soil and shallow water habitat is available throughout the year to support resident, breeding, wintering and migrant birds.

Rice acreage in the region exceeds 800,000 acres and crawfish acreage approaches 200,000 acres. Rice is cultivated in the warm months from spring into fall. Crawfish is cultivated from fall into spring. The two

crops compliment each other. Although little crawfish is cultivated in California, feral populations of the same species cultivated in Louisiana and Texas, the red swamp crawfish, are present throughout the state's rice production areas and provide significant macro-invertebrate food resources for predaceous waterbirds. There is a direct correlation between geometric increases in wading bird populations – egrets, herons, night-herons, ibises, and spoonbills – in Louisiana and the development of the state's crawfish industry over the past half century.

Current trends in agriculture are positive for the production of crops along the Gulf and in California. However, these very factors place habitat quantity and quality for waterfowl and other wetland-dependent wildlife at risk by replacing beneficial crop systems with crop systems that leave no residual habitat, or maintain the moist-soil conditions necessary for production of beneficial plant materials, invertebrates, small fish, crawfish and related habitats. The decline in available habitat on agricultural producing land will concentrate the birds on fewer acres resulting in degraded habitat quality, increased risk of avian disease outbreaks and population decline.

Of special concern is the loss of coastal and interior wetlands in southern Louisiana. Since 1950, over 1.5 million acres of coastal wetlands have been lost along the Louisiana coast. Waterbirds have responded favorably to the working wetlands immediately adjacent to this coast as has been documented by a number of studies.

Similar to the Grassland Reserve Program's annual payment for a "broader" natural resource benefiting management on working grasslands, a payment for working wetland management on cropland will enhance the habitat essential to sustaining waterfowl and other wetland-dependent wildlife. The historic contribution of agricultural production areas for meeting waterfowl and other wetland-dependent wildlife habitat needs, as wetland conversion reduced the native habitat, is well documented. Public participation in a "working lands concept" will extend the beneficial use of these lands to the greater benefit of society in providing habitat requirements without restricting much needed agricultural production.

Recommendation:

The Natural Resources Conservation Service will establish under the authorities of the Wildlife Habitat

Incentives Program (WHIP) and the Environmental Quality Incentives Program (EQIP) a “working wetlands” pilot program for working agricultural lands providing waterfowl and other wetland-dependent wildlife habitat through water management practices. Key components of the pilot program effort will be:

1. The program will be offered in rice and/or crawfish production areas of Southern Louisiana, Texas and California;
2. Annual per acre cost-share and/or incentive payments will be available for up to 5 years for program participants completing working wetland-management practices;
3. The payment will be for wetland-management practices that provide benefits to waterfowl and other wetland-dependent wildlife;
4. Payments will be offered for three different payment levels as related to the length/period of habitat availability and quality of management (forage/diet and water);
5. Payment ranges will be established in the range of \$25 to \$50/acre/year as established by the state conservationist in consultation with the State Technical Committee. The rates will be based on actual costs of the practices in the respective states.

Note:

The Working Wetlands Habitat Initiative was submitted to the U. S. Department of Agriculture in August 2008. No final action has been taken as of this writing (October 2008). Organizations, no matter how large or small, are encouraged to support the initiative. To do so, they should direct inquiries as follows:

Mr. Jeffery Durand, Co-Coordinator
Working Wetland Habitat Initiative

Minutes of the Regular Meeting
October 14, 2008, 6:30 p.m.
Museum of Life Sciences at LSU

Program—Mac Hardy has been using motion actuated cameras in this region to search for ring-tailed cats. Although he has not found the cats, he obtained many pictures of other animals including birds. His presentation was called “A Motion Camera Survey of Northwestern Louisiana.”

Announcements—Jim Ingold announced that Ruth Smolenski, wife of BSG club member Will Smolenski, recently passed away.

Membership—Mac Hardy said that the mailing list includes 188 addressees and that the club has five new members since the last meeting.

Programs—Mac reported that John Dillon will present the next program called “A Naturalist’s Field Trip to Colorado.”

Bird Report—Mac Hardy said that the bird report in the last newsletter was incorrect and that he had corrected copies to distribute. Mac also has printed a new checklist of the birds of northwestern Louisiana.

Field Trips—John Dillon reported on upcoming field trips. A fieldtrip to Bodcau WMA is planned for November 22. Details will be in the next newsletter. Nancy Menasco announced that the fourth Red River NWR Celebration will take place at the headquarters unit in Bossier Parish.

Donations—Jim Ingold said that the board voted to donate \$250.00 to each of the following organizations: Baton Rouge Audubon Society (for use at Peveto Woods), the Red River Refuge Alliance, and the Region 6 National Association for Interpretation. Since these donations are greater than \$100.00, they must be approved by the membership. The membership voted to approve the three donations.

Bird Talk—Nancy Menasco reported that a **Peregrine Falcon** was spotted by Jeff Trahan at the Big Sit. She also said that about 20 **Scissor-tailed Flycatchers** and a **Yellow-billed Cuckoo** were seen there. Jerry Bertrand said that he spotted a **Mississippi Kite** at the Big Sit and that this is close to being a late fall date for this species. Kathy Basham spotted four **Anhinga** and an **American White Pelican** while kayaking on Cross Lake.

MINUTES OF THE BOARD MEETING

October 7, 2008

Museum of Life Sciences at LSUS

Board members participating in the meeting were Mac Hardy, Jeff Trahan, Jean Trahan, Nancy Menasco, Amanda Lewis, Jim Ingold, Hubert Hervey, Jerry Bertrand, Rachel Demascal, John Dillon, and Rosemary Seidler.

Treasurer's Report—Jean Trahan reported that for the month ending September 30, 2008, the club had \$5,469.34 in the bank. In addition, we had \$175.19 and \$793.84 in prepaid expenses at the post office and LSUS printing, respectively. The fund balance is \$6,438.37.

Field Trips—John Dillon said that the next field trip would be the Big Sit at the Red River NWR Headquarters Unit on Sunday, October 12. Nancy Menasco said that the Louisiana Ornithological Society fall meeting will not be in Cameron because recent hurricane damage to that area. It is scheduled to take place in Lafayette on the last full weekend in October. John asked if there would be interest in a bird count in January or February at the LSU Hill Farm in Claiborne Parish. The board encouraged him to organize the count.

Memberships—Mac Hardy reported that he had no exact number of memberships available at that time, but he will have the number at the regular Tuesday meeting. However, he did say that there was no significant change in the total membership.

Hospitality—Amanda Lewis said that Silviera Hunt will take care of refreshments at the next meeting.

Programs—Mac Hardy said that John Dillon will speak about birds and other animals of Colorado at the next meeting. The title of the presentation will probably be "A Naturalist's Field Trip to Colorado." John Dillon asked that we have a discussion about possibly changing the auction at the Christmas party at the December meeting.

Newsletter—Jim Ingold reported that the next newsletter would be huge because the first one was one page. The newsletter would not be mailed until Friday, October 10, before the next Tuesday meeting. Since news of the Big Sit is in the newsletter and the Big Sit will take place on Sunday, October 12, the membership should be sent an email notifying them about the Big Sit.

Publicity—Rachel Demascal has sent out a press release for the October meeting.

Donations—After some discussion, a motion was made and approved to donate \$250.00 to each of the following organizations: Baton Rouge Audubon Society (for use at Peveto Woods), the Red River Refuge Alliance, and the Region 6 National Association for Interpretation. Since these donations are greater than \$100.00, they must be approved by the membership at the next regular meeting.

BIRD REPORT – compiled November 4, 2008

Use the bird report to see what other birders have been seeing and where to go find the bird you want to see. Observers are abbreviated by the first and last initials. Dates and localities of observations are summarized under the observer’s initials. Sightings are arranged by species. Following each species is a line of data in the following format: date, initials of the observer, number of birds observed, initials of another observer, number of birds they observed, etc. For the number of birds observed, a 1 is used for both 1 bird and for numbers not reported by the observer. For example: 01/12/99 BB 2 means that on January 12, 1999, BB saw two birds. Then by looking on the observer list, located after the sightings, you can determine that BB is Bob Birder and on 1/12/99 he was birding C. Bickham Dickson Park.

Report bird records for the newsletter to Mac Hardy by the 15th of each month. All bird records reported here are observations of the observers and are therefore the responsibility of the observer.

DECEMBER MEETING ANNUAL HOLIDAY DINNER AND AUCTION

A sign-up sheet will be available at the November meeting for bringing side dishes. The Bird Study Group will provide the meat and drinks.

Remember to bring auction items to the November meeting or bring them to the Museum of Life Sciences at least a week before the party.

Next Meeting – December 9, 2008
ANNUAL HOLIDAY DINNER
AND AUCTION

DECEMBER PROGRAM

When: Tuesday, December 9, 2008, 6:00 p.m.
Where: LSU in Shreveport Museum of Life Sciences

UPCOMING FIELD TRIPS AND EVENTS

WINTER/CHRISTMAS BIRD COUNTS:

CADDO LAKE WINTER WARM-UP BIRD COUNT

Saturday, December 6, 2008
Compiler – Dorothy Metzler of Northeast Texas Field Ornithologists (NETFO)
Louisiana Coordinator – Jim Ingold, 797-5236 (W), 742-5067 (H), james.ingold@lsus.edu

CLAIBORNE CHRISTMAS BIRD COUNT

Tuesday, December 16, 2008
Compilers–Nancy Menasco, nmcpa@aol.com, 868-3255, and Mary Ellen (M.E.) Lewis, 318-927-9280, melewis180@aol.com

SHREVEPORT CHRISTMAS BIRD COUNT

Saturday, December 20, 2008
Compiler – Charlie Lyon, 865-2674 (H), 222-8421 (W), lyon5516@bellsouth.net

NATCHITOCHE CHRISTMAS BIRD COUNT

Saturday, December 27, 2008
Compiler – Charlie Lyon, 865-2674 (H), 222-8421 (W), lyon5516@bellsouth.net

BOSSIER – CADDO - BIENVILLE CHRISTMAS BIRD COUNT (BCBCBC)

Saturday, January 4, 2009
Compiler – Paul Dickson, 797-7900 (W), 798-1000 (H), Paul@morrisdickson.com

WILD BIRD CENTER EVENTS

Beginner Bird Walks

There will be no Saturday bird walks during December.

UPCOMING FIELD TRIPS AND EVENTS

By John Dillon

All field trips will **DEPART** from the listed meeting place at the time posted. Be early at the meeting place for orientation information and carpooling. BSG Membership is not a requirement for participation in any field trip, but it is encouraged.

What to bring: binoculars, field guide, scope (if possible), snacks/drinks for yourself and pen/paper if you'd like to keep your own records of sightings.

DECEMBER

A note on Christmas Bird Counts. While participation in CBC's is high for the BSG, we have many members who do not participate, often because they are still learning how to identify species, how to find good habitats, or other aspects of birding that more experienced birders take for granted. So, if you are new to birding or to the BSG, we encourage you to ask questions about the CBC's. There's no better way to become a birder than by being in field finding and identifying birds.

If you are interested in going on a CBC for the first time, ask one of the board members or any other active member about what to do. You'll also need to contact the CBC compiler as soon as possible to let him or her know that you're interested. The compiler should probably be able to pair you with an experienced local birder who can teach you a lot. Or, if you live within the count area, you can simply phone in species and numbers you had in your yard that day. But be sure to contact the compiler well in advance so that you know what you are supposed to do.

WINTER WARM-UP COUNT, SATURDAY, DECEMBER 6.

Texas compiler, Dorothy Metzler (Northeast Texas Field Ornithologists (NETFO))

Louisiana compiler, Jim Ingold. 797-5236 (W), 742-5067 (H), james.ingold@lsus.edu

The BSG will once again count birds in the Louisiana portion of the circle. Participants will meet at the Metzler's Caddo Lake house in Uncertain, Texas, for supper and to call the list. If you unable to attend, you may meet Jim at Horace Downs Park near the Caddo Lake Dam around 4:00 PM to turn in your list.

CLAIBORNE CBC, TUESDAY, DECEMBER 16.

Compiler, Nancy Menasco, nmcpa@aol.com 868-3255 (H) and Mary Ellen "M.E." Lewis, 318-927-9180, melewis180@aol.com

Participants will meet at the home of M.E. and Fred Lewis on Lake Claiborne for supper and to call the list.

Contact Nancy or M.E. for information in regard to lodging for Monday and/or Tuesday night. Most of the free lodging is already reserved, but there *may* be something available. Lake Claiborne State Park (1-877-226-7652) has very nice cabins available at \$65 per night.

SHREVEPORT CBC

SATURDAY, DECEMBER 20.

Compiler, Charlie Lyon, 865-2674 (H), 222-8421 (W), lyon5516@bellsouth.net. Details TBA.

NATCHITOCHEs CBC

SATURDAY, DECEMBER 27.

Compiler, Charlie Lyon. 865-2674 (H), 222-8421 (W), lyon5516@bellsouth.net. Details TBA.

JANUARY

BOSSIER-CADDO-BIENVILLE CBC

SUNDAY, JANUARY 4, 2009.

Compiler, Paul Dickson, 797-79000 (W), 798-1000 (H), paul@morrisdickson.com

Participants will meet at Paul Dickson's home at 10455 Ellerbe Road (across from Holy Angels) for supper and to call the list.

WILD BIRD CENTER EVENTS**Beginner Bird Walks**

There will be no Saturday bird walks during December.

For more information on any Wild Bird Center event, call Dennis or Janice Forshee at the Wild Bird Center, 318-797-BIRD (2473).

**BODCAU FIELD TRIP:
A TRUE AND ACCURATE ACCOUNT**

By John Dillon

On Saturday, November 22, John Dillon led a field trip to Bodcau Wildlife Management Area. As a matter of fact, John, intrepid as usual, was not only leader of the field trip, but he alone comprised the active membership of the BSG for the trip. For, as he is sure to remind you at subsequent meetings, field trips, CBC's, and other BSG functions, he was the only person to show up.

But that's okay. He, like all the other members, had been watching the weather predictions all week and was not looking forward to birding in the cold weather. Yet in spite of inclement weather, John got up early on his day off and drove 35 miles to Bodcau to lead, I dare say, the most interesting field trip in recent BSG history. Since, and I can say this with complete accuracy, you, the reader, did not go to Bodcau that day, John has graciously provided you with the following narrative of the field trip, not the least of which is fabricated, prevaricated or otherwise made up to guilt you into going to the next trip he schedules.

When I awoke that fateful day and looked outside, I knew it would be difficult for me to make it to Bodcau. But I also knew that the kind, always-involved membership of the BSG would be counting on me to lead them through the cold, dangerous woods to find our feathered friends. So, I arose and packed all my birding gear into my SUV, eager to meet my compatriots. Oh, did I forget to mention that I packed breakfast for my true and faithful friends? I had spent the night before slaving away making homemade cinnamon rolls, linking my own sausage, stirring pancake batter made from scratch, and boiling apple cider spiked with enough rum to make a moose stagger. An inconsequential fact I know, but you see I'm nothing if not completely factual and honest – especially to friends as dependable as you.

I arrived at Bodcau at 7:40 a.m., an amazing feat in and of itself because of the blinding snowstorm I drove

through. But, alas, I thought, my friends need their brave field trip leader. I can't let them down. Still, the difficult trip was a blessing. In a moment of fortuitous forethought, I'd brought my chainsaw in case travel became impenetrable. As luck would have it, I had to use the chainsaw to clear the road for a young husband and his pregnant wife who were on their way to the hospital to deliver their first child. As they thanked me with tears of joy in their eyes, the soon-to-be mother cried, "We'll name him 'John' – after our hero." I sure hope they made it.

While I waited in the parking lot for the other brave BSG members, I decided to do a little birding to pass the time. Most of the birds were expected – woodpeckers, sparrows, a **Bachman's Warbler** – or two. I began walking around the Durden house and started pishing. Then, I heard a massive flock of birds overheard. It was hard to see – you know, because of the snowstorm – but just over the trees, where the flamingos were, a flock of **Passenger Pigeons** darkened the morning light. It was a beautiful sight. My only regret was that nobody from the BSG had arrived yet to share this vision.

In another few minutes, prior to the **Ivory-billed Woodpecker** but after the penguins, I heard a call I don't believe I'd ever heard before. I wondered if the cider was too strong, that maybe I was just hearing grunts of hunters in the woods. But my eyes could not be mistaken. It was the great native **American Thunderbird**. The beast was forty feet from wingtip to wingtip. Because I wanted to be as accurate as possible in my measurements, I used the flock of **Wandering Albatrosses** for scale. He landed right in the parking lot, and we began to talk. He told me he was beside himself with much depression. I said, "Great native **American Thunderbird**, is it because of man's dominion over nature; or because of our continued lack of concern for the environment? Because Fox News continues to insist they're fair and balanced?" "No," he said, "It is because some friends of mine were supposed to meet me somewhere, and they didn't show up." I consoled the great spirit-bird, and I told him of my worthy, dependable companions in the BSG and how **I could always count on them, no matter what**. The story warmed the Thunderbird's heart, or maybe it was the cider, but he was happy, nevertheless.

Suddenly, watching the thunderbird soar over the cypress trees, I realized I was still the only one there. But there was no way I could let worry or frustration set in. I knew that everyone must have really, really, extraordinarily good reasons for not showing up. After

all, my friends would never let a little cold weather stand in the way of good birding. So, it must have been something worthwhile. How could I possibly get upset? So, I climbed into my SUV and began to drive back, another 35 miles, home, eagerly wondering what the next BSG field trip would hold for me.

[A note from John Dillon’s psychiatrist: As you can clearly see, John is delusional. I believe the shock of no one showing up for the field trip was too much for his mind to take. In my professional opinion, the only way I see to snap him out of this persistent state of denial is for you to attend the next field trip he schedules. And bring him homemade cookies. If you would like the list of birds John had while waiting 25 minutes in the parking lot at Bodcau, you can email him at jdillon@websterpsb.org.]

HOLIDAY DINNER AND AUCTION

Remember:

To bring auction items to the museum, hopefully before the day of the auction.

That: the BSG supplies the meat and drinks.

To: bring a covered dish. As of this writing this is what members have signed-up to bring; numbers in parentheses indicate the number of people: bread (3); hot side dish (5), cold side dish (6), and dessert (5). If you haven’t signed up to bring anything use the above numbers to make your decision.

Help Mac and Jim set the room on Tuesday during the day. Call Mac to volunteer.

MONTHLY MEETING REFRESHMENTS

We need someone to supply the refreshments for the April and June meeting. If you are interested email or call Jim Ingold

Minutes of the Regular Meeting
November 11, 2008, 6:30 p.m.
Museum of Life Sciences at LSU

Program— John Dillon presented the program called “A Naturalist’s Field Trip to Colorado.”

Field Trips—John Dillon reported on upcoming field trips: a field trip to Bodcau WMA is planned for November 22; the Caddo Lake Winter Warm-up Count is December 6; the Shreveport CBC is December 20; the Natchitoches CBC is December 27, the BCBCBC is January 4, and the Claiborne CBC is Tuesday, December 16.

Hospitality—Both Nancy Menasco and Silviera Hunt brought refreshments to the meeting.

Christmas Party—The next meeting will be the Christmas Party and auction. Jim Ingold reminded everyone to bring items for the auction and to deliver them before the night of the Christmas Party.

RRNWR—Nancy Menasco said that the Headquarters Unit of the RRNWR in Bossier Parish will be open this Saturday, November 15, until 3:00 p.m. She reminded everyone that the photo contest is still going on.

Bird Talk—Larry Raymond was on Caddo Lake and saw **Herring Gulls, American Coots, and Double-crested Cormorants**. Jim Ingold reported a buteo that was 90% white at Ashley Ridge. However, he did not know what kind of buteo was. Rosemary Seidler reported that she recently had many **Dark-eyed Juncos** and **White-throated Sparrows** in her yard in Shreveport. Amanda Lewis said that she found a **Merlin** in Bickham Dickson Park.

BIRD REPORT – compiled November 30, 2008

Use the bird report to see what other birders have been seeing and where to go find the bird you want to see. Observers are abbreviated by the first and last initials. Dates and localities of observations are summarized under the observer's initials. Sightings are arranged by species. Following each species is a line of data in the following format: date, initials of the observer, number of birds observed, initials of another observer, number of birds they observed, etc. For the number of birds observed, a 1 is used for both 1 bird and for numbers not reported by the observer. For example: 01/12/99 BB 2 means that on January 12, 1999, BB saw two birds. Then by looking on the observer list, located after the sightings, you can determine that BB is Bob Birder and on 1/12/99 he was birding C. Bickham Dickson Park.

Report bird records for the newsletter to Mac Hardy by the 15th of each month. All bird records reported here are observations of the observers and are therefore the responsibility of the observer.

NEWSLETTER

Volume 23, Number 05

January 5, 2009

Next Meeting – January 13, 2009
A VIRTUAL BIRDING TRIP TO BEAR RIVER
MIGRATORY BIRD REFUGE
JEAN AND JEFF TRAHAN

JANUARY PROGRAM

When: Tuesday, January 13, 2009, 6:00 p.m.
Where: LSU in Shreveport Museum of Life Sciences

Explore a freshwater oasis for migratory birds surrounded by desert lands and the Great Salt Lake. Jeff and Jean Trahan will share their stunning photographs and stories of Bear River and Antelope Island.

UPCOMING FIELD TRIPS AND EVENTS

JANUARY

Louisiana Winter Bird Atlas (January 10 – February 20)

FEBRUARY

CHENEYVILLE – SANDHILL CRANES
February 7, 2009, 7:00 a.m.

GREAT BACKYARD BIRD COUNT
February 13-16

More details on page 2

2008 HOLIDAY PARTY AND AUCTION RESULTS

The 2008 BSG Auction made a very respectable \$550.00. Despite a smaller than usual crowd the 2008 auction made \$0.50 more than the 2007 auction. Hubert Hervey was as usual an entertaining and energetic auctioneer. Some lucky bidders got to purchase a limited edition biography of the auctioneer. The food was excellent, and a good time was had by all.

That's all folks – Jean Trahan

NEXT BOARD MEETING

The next meeting of the Board of Directors of the Bird Study Group will be Tuesday, 3 February 2009 in the Museum of Life Sciences at 6:30 p.m.

BIRD STUDY GROUP PHONE NUMBERS AND MORE

UPCOMING FIELD TRIPS AND EVENTS

By John Dillon

All field trips will **DEPART** from the listed meeting place at the time posted. Be early at the meeting place for orientation information and carpooling. BSG Membership is not a requirement for participation in any field trip, but it is encouraged.

What to bring: binoculars, field guide, scope (if possible), snacks/drinks for yourself and pen/paper if you'd like to keep your own records of sightings.

JANUARY

Louisiana Winter Bird Atlas (January 10 – February 20)

Because this is the final year for the LWBA, the BSG will be light on field trips for January and February. Several of our usual field trip leaders have multiple quads to bird, but we hope to have a few field trips lined up for migration in March and April, just around the corner!

That being said, we encourage you to get out there and bird! For those of you who may not know, the Louisiana Winter Bird Atlas is a 3-year volunteer study of LSU that aims to produce accurate data reflecting the distribution, density, and general numbers of bird species in our state during the winter. This is the final year for data collection. Below is a partial list of local quads and compilers for you to consider as you bird during this time. For more specific information, such as quad maps and boundaries, FAQ's, and unofficial quad results, please access the LSU Bird Resource Center website at

<http://appl003.lsu.edu/natsci/labirdweb.nsf/index>

Please remember two things if you consider birding anyone's quads:

First, please be courteous and check with the appropriate quad compiler prior to birding the area. Some quads may need more birding time than others, and the compilers may suggest certain quads

or areas within quads to bird or to avoid. Or, you and the compiler may wish to make a date to bird a quad together.

Second, when you input your data into eBird, be sure to scroll down on the eBird homepage until you see the link for the Louisiana Winter Bird Atlas. Access the LWBA page by clicking the link, taking you to the page with the following URL, www.ebird.org/LWBA/index.html If you do not input your data into the specified LWBA section, your data will simply go into eBird and not into the LWBA. You may also use the new eBird feature of sharing your observations and send the compiler a list of the birds seen. If you have never registered with eBird, you will need to do so; it is free, and it is a wonderful online birding resource.

Here is a partial list of local quads of BSG members (apologies to those who may not be represented here; the list on the LBRC site is not updated.):

Arizona – M.E. Lewis
 Blanchard – Larry Raymond
 Bossier City – Jim Ingold
 Bryceland – Rosemary Seidler
 Colquit – John Dillon
 Dixie – Paul Dickson
 East Point – Paul Dickson
 Gibsland – Rosemary Seidler
 Gilliam – Rosemary Seidler
 Homer – John Dillon
 Keatchie – Ron and Susan Martin*
 Koran – Jim Ingold
 Langston – John Dillon
 Leton – John Dillon
 Mooringsport – Larry Raymond
 North highlands – Larry Raymond
 North Minden – Minden HS Nature Club
 Shreveport East – Jean and Jeff Trahan
 Simsboro – Rosemary Seidler
 Spring Ridge – Larry Raymond
 Stonewall – Huber Hervey
 Summerfield – John Dillon
 Wallace Lake – Mac Hardy

*Ron and Susan Martin have since moved out of state. Anyone interested can email Van Remsen c/o the Louisiana Bird Resource Center to see if this quad has a new compiler.

FEBRUARY**CHENEYVILLE – SANDHILL CRANES**

Saturday, February 7, 2009, 7:00 a.m.

Trip Leader – Jim Ingold – 797-5236 (W), 742-5067 (H), james.ingold@lsus.edu

Meet at the LSUS Museum of Life Sciences. Tour the back roads of the Cheneyville-LeCompte area by car to see **Sandhill Cranes**, waterfowl, waders, and shorebirds wintering in the rice fields. Bring a lunch to eat in the car.

GREAT BACKYARD BIRD COUNT

Friday, February 13 – Monday, February 16, 2008

Compiler – Cornell Laboratory of Ornithology/National Audubon Society; <http://www.birdsource.org/gbbc/>

Go to the above webpage for details.

**WILD BIRD CENTER EVENTS
BEGINNER BIRD WALKS**

The Wild Bird Center conducts field trips the first and third Saturday of every month, weather permitting. Meet at Wild Bird Center in the University Place Shopping Center (Target Shopping Center) at the corner of Youree Drive and East 70th Street. Destinations vary according to local sightings and may include local parks, country roads or a private backyard. Loaner binoculars are available. Be sure to bring a field guide.

Join Dennis at the Red River NWR Celebration on October 18.

For more information on any Wild Bird Center event, please call Dennis or Janice Forshee at the Wild Bird Center, 318-797-BIRD (2473).

BSG Board of Directors & Committee Chairpersons**BSG BOARD OF DIRECTORS****OFFICERS**

President – Jim Ingold (1)..... 861-5294 (H), 797-5338 (W)

Publicity – Rachel Demascal..... 929-2806 (W)
Website – Jerry Bertrand..... 868-3255 (H/W)

BIRD REPORT – compiled January 2, 2009

Use the bird report to see what other birders have been seeing and where to go find the bird you want to see. Observers are abbreviated by the first and last initials. Dates and localities of observations are summarized under the observer's initials. Sightings are arranged by species. Following each species is a line of data in the following format: date, initials of the observer, number of birds observed, initials of another observer, number of birds they observed, etc. For the number of birds observed, a 1 is used for both 1 bird and for numbers not reported by the observer. For example: 01/12/99 BB 2 means that on January 12, 1999, BB saw two birds. Then by looking on the observer list, located after the sightings, you can determine that BB is Bob Birder and on 1/12/99 he was birding C. Bickham Dickson Park.

Report bird records for the newsletter to Mac Hardy by the 15th of each month. All bird records reported here are observations of the observers and are therefore the responsibility of the observer.

Next Meeting – February 13, 2009
RED RIVER EDUCATION AND RESEARCH
PARK/C. BICKHAM DICKSON PARK
BY AMANDA C. LEWIS

FEBRUARY PROGRAM

When: Tuesday, February 10, 2009, 6:00 p.m.

Where: LSU in Shreveport Museum of Life Sciences

BSG member, Amanda C. Lewis of the LSUS Red River Watershed Management Institute will present an overview of Red River Education and Research Park at Sunflower Point, C. Bickham Dickson Park including a summary of ongoing research activities. The park is jointly operated by the City of Shreveport and LSUS. Along with being a local birding hotspot the park is a unique 585 acre wetland used for research and education.

Louisiana Winter Bird Atlas (January 10 – February 20)

CHENEYVILLE - SANDHILL CRANES

Saturday, February 7, 2009, 7:00a.m.

Trip Leader – Jim Ingold – 797-5236(W), 742-5067(H),
jamesingold@lsus.edu

RUSTY BLACKBIRD HOT SPOT BLITZ

February 7 – 15

Compiler – International Rusty Blackbird Technical Working Group, Cornell Laboratory of Ornithology and National Audubon Society.

GREAT BACKYARD BIRD COUNT

Friday, February 13 – Monday, February 16

Compiler – Cornell Laboratory of Ornithology/National Audubon Society; <http://birdsource.org/gbbc/>

WILD BIRD CENTER EVENTS

BEGINNER BIRD WALKS

Saturday, February 7 and 21 2009

UPCOMING FIELD TRIPS AND EVENTS

By John Dillon

All field trips will **DEPART** from the listed meeting place at the time posted. Be early at the meeting place for orientation information and carpooling. BSG Membership is not a requirement for participation in any field trip, but it is encouraged.

What to bring: binoculars, field guide, scope (if possible), snacks/drinks for yourself and pen/paper if you'd like to keep your own records of sightings.

FEBRUARY

Louisiana Winter Bird Atlas (January 10 – February 20)

Good news! The WBA has officially been extended for a fourth year and a fifth year is possible. As many of you already know, there are many quads in North Louisiana that have never been birded for the WBA. Maybe you, too, can find a Red-throated Loon or a Little Gull!

To find quads that need birding, log on to <http://ebird.org/content/la/>. Then select "View and Explore Data" followed by "bar charts." Select "Atlas Quadrangles in this state" and hit "Continue." Then, choose the quads you wish to see results quad by quad.

In order to have an accurate picture of birdlife in the state, we need to fill in the current gaps of quads that have not been birded.

For more specific information, such as quad maps and boundaries, FAQ's, and unofficial quad results, please access the LSU Bird Resource Center website at:

<http://appl003.lsu.edu/natsci/labirdweb.nsf/index>

CHENEYVILLE - SANDHILL CRANES

Saturday, February 7, 2009, 7:00a.m.

Trip Leader – Jim Ingold – 797-5236(W), 742-5067(H), jamesingold@lsus.edu

Meet at the LSUS Museum of Life Sciences. Tour the back roads of the Cheneyville-LeCompte area by car to see **Sandhill Cranes**, waterfowl, waders, and shorebirds wintering in the rice fields. Bring a lunch to eat in the car.

RUSTY BLACKBIRD HOT SPOT BLITZ

February 7 – 15

Compiler – International Rusty Blackbird Technical Working Group, Cornell Laboratory of Ornithology and National Audubon Society.

Support the declining Rusty Blackbird by reporting your observation through eBird. For more information go to:

http://nationalzoo.si.edu/ConservationAndScience/MigratoryBirds/Research/Rusty_Blackbird/protocol.cfm

GREAT BACKYARD BIRD COUNT

Friday, February 13 – Monday, February 16

Compiler – Cornell Laboratory of Ornithology /National Audubon Society:

<http://birdsource.org/gbbc/>

From the GBBC site: The twelfth annual Great Backyard Bird Count (GBBC) is fast approaching—February 13 is less than a month away! Plan to join tens of thousands of other bird watchers across North America as we tally the birds over these four days. Count on your own or with family, friends, and neighbors to make this the biggest, best GBBC ever!

Observations for the GBBC are based on individual ZIP codes and can be entered at the GBBC website.

WILD BIRD CENTER EVENTS BEGINNER BIRD WALKS

Saturday, February 7 and 21 2009

The Wild Bird Center conducts field trips the first and third Saturday of every month, weather permitting.

Meet at Wild Bird Center in the University Place Shopping Center (Target Shopping Center) at the corner of Youree Drive and East 70th Street. Destinations vary according to local sightings and may include local parks, country roads or a private backyard. Loaner binoculars are available. Be sure to bring a field guide.

For more information on any Wild Bird Center event, please call Dennis or Janice Forshee at the Wild Bird Center, 318-797-BIRD (2473).

GREAT BACKYARD BIRD COUNT AT THE RED RIVER NATIONAL WILDLIFE REFUGE

Saturday, February 14, 2009, 8:00 a.m.-4:00 p.m.

Sponsors: Friends of the Red River National Wildlife Refuge, U.S. Fish & Wildlife Service, Wild Bird Center of Shreveport

Contact – Nancy Menasco, 868-3255 (H/W), nmcpa@aol.com

You are invited to help count birds during the 12th Annual Great Backyard Bird Count at the Red River National Wildlife Refuge Headquarters in Bossier City. Come walk the trails in the pecan grove or along the river.

Schedule of Activities:

8:00 a.m. until – Breakfast with the Birds. Breakfast bars, shade-grown coffee, hot tea, hot chocolate, and juice.

8:30 a.m. – Bird Walk. Children accompanied by an adult are welcome.

All Day – Feeder watch, walking trails, informal refuge tours.

Rain date: In case of rain, the event will be rescheduled for Saturday, March 7, 2009.

Directions to the refuge: From the intersection of US 71 (Barksdale Boulevard) and Jimmie Davis Highway (LA 511) in Bossier City, go south about one-half mile on US 71/Barksdale Blvd and turn right (west) on Sunflower Road. Proceed to the end of the road and through the gate into the refuge. You'll see the Red River National Wildlife Refuge entrance sign as you enter. The Headquarters Unit is not yet open to the public on a regular basis; however, you may visit the refuge whenever the refuge manager or refuge biologist is onsite. Please call the refuge at 742-1219 before visiting.

Owl Moon Open House

Shreveport, Louisiana, February 7, 2009. Visit Walter B. Jacobs Memorial Nature Park anytime between 6:30 p.m. and 8:30 p.m. and experience the forest at night, discover three kinds of owls and explore the Interpretive Building full of live animals and exhibits about the natural world. For even more adventure, join Naturalist and Caddo Parish Parks Director Larry Raymond for a night hike along the more remote trails of the park. Refreshments are provided by Wild Bird Center.

This program is appropriate for all ages. Bring your flashlight and dress for the weather. There is no cost to attend this program or to visit the park. For more information, contact Rachel Demascal at rdemascal@caddo.org, or 318-929-2806.

Minutes of the Regular Meeting

December 9, 2008, 6:30 p.m.

Museum of Life Sciences at LSUS

Hubert Hervey was the auctioneer at the annual December Christmas party. The president, Jim Ingold, did not conduct a business meeting. Everyone enjoyed dinner and the auction.

Minutes of the Regular Meeting

January 13, 2009, 6:30 p.m.

Museum of Life Sciences at LSUS

Program— Jeff and Jean Trahan presented a program on their visit to Bear River Migratory Bird Refuge. The refuge is located near Ogden, Utah, on the Great Salt Lake.

Field Trips—John Dillon was not present so Jim Ingold reported on field trips. The winter meeting of the Louisiana Ornithological Society will be held January 30 through February 1 in Abita Springs. Jim Ingold will lead the **Sandhill Crane** field trip to Cheney, LA, February 7. Meet at the LSUS museum at 7:00 a.m. The Winter Bird Atlas takes place January 10 through February 20. The Great Backyard Bird Count occurs February 14 through February 16. Beginning Bird Walks are conducted by Dennis Forshee on the first and third Saturdays of each month. Call Dennis at the Wild Bird Store for further information.

Hospitality—Jim Ingold, Bill Wood and Shirley Huss brought refreshments to the meeting. Jean Trahan will provide refreshments at the February meeting.

Bird Talk—Cathy Basham reported a **Brown Pelican** on the Red River just below Campti. Linda Adrion also reported one at Lock and Dam #5. Nancy Menasco said that Ronnie Maum took a photo of a possible **Ash-throated Flycatcher** at the Red River Refuge. Jerry Bertrand said that there is a **Bald Eagle** nest on Adams Point on Lake Bistineau. Rosemary Seidler saw her first **Pine Siskin** of the year today at her house. She said that others have been reporting them in large numbers, but this is the first that she has seen. John McBride said he has an **Orange-crowned Warbler** eating peanuts at his feeder at his house.

BIRD REPORT – *compiled February 2, 2009*

Use the bird report to see what other birders have been seeing and where to go find the bird you want to see. Observers are abbreviated by the first and last initials. Dates and localities of observations are summarized under the observer's initials. Sightings are arranged by species. Following each species is a line of data in the following format: date, initials of the observer, number of birds observed, initials of another observer, number of birds they observed, etc. For the number of birds observed, a 1 is used for both 1 bird and for numbers not reported by the observer. For example: 01/12/99 BB 2 means that on January 12, 1999, BB saw two birds. Then by looking on the observer list, located after the sightings, you can determine that BB is Bob Birder and on 1/12/99 he was birding C. Bickham Dickson Park.

Report bird records for the newsletter to Mac Hardy by the 15th of each month. All bird records reported here are observations of the observers and are therefore the responsibility of the observer.

Wood Duck -- 01/04/2009 LP,BC&SH 3; 01/04/2009 LRR 9; 01/04/2009 LP,BC&SH 3; 01/10/2009 HH 7; 01/15/2009 HH 4; 01/19/2009 LRR 1; 01/19/2009 LRR 2; 01/24/2009 LR&TD 5; 01/24/2009 LR&TD 17; 01/25/2009 BW 2; 12/06/2008 RS 3; 12/06/2008 RS 3; 12/16/2008 RS,LA 2; 12/20/2008 SH, LA & PL 9; 12/20/2008 RS,EM 4; 12/31/2008 LRR 17

UPCOMING FIELD TRIPS AND EVENTS

By John Dillon

All field trips will **DEPART** from the listed meeting place at the time posted. Be early at the meeting place for orientation information and carpooling. BSG Membership is not a requirement for participation in any field trip, but it is encouraged.

What to bring: binoculars, field guide, scope (if possible), snacks/drinks for yourself and pen/paper if you'd like to keep your own records of sightings.

MARCH

BIRDING AT BARKSDALE AIR FORCE BASE

Saturday, March 28; 7:00 a.m. – 2:00 p.m.

Trip Leader: John Dillon – 318-243-2284; jdillon@websterpsb.org

This will be the BSG's first field trip to Barksdale in nearly ten years! Come bird the 22,000 acre East Reservation, a protected area with very limited human intrusion. This huge tract features miles of uninterrupted hardwood forest, some mature pine stands, half a dozen lakes, several ponds, bayous, and open fields. This is a local trip that you really don't need to miss.

Meet in the parking lot of Barksdale Federal Credit Union on North Gate Road at 7:00 a.m. You will need a valid I.D., preferably a Louisiana Driver's License. Binoculars, scopes, and cameras have all been cleared with base security. Be sure to bring a sack lunch for a picnic at Clear Lake Park. There are restroom facilities at the park.

John Dillon will distribute a sign-up sheet at the March meeting for those who plan to go. If you are unable to attend the March meeting but would like to go on the trip, please email John directly. Names of all participants must be submitted to base security at least 5 days prior to the trip.

APRIL

LOS SPRING MEETING – GRAND ISLE

Friday, April 17- Sunday, April 19

Information and registration forms for the annual spring meeting are or will be available at the Louisiana Ornithological Society website at <http://losbird.org/meeting.htm>. The spring meeting this year will be in Grand Isle because of ongoing repairs in Cameron Parish. Check the LOS website and LABIRD posts for more information regarding lodging, presentations, and field trips.

MAY

INTERNATIONAL MIGRATORY BIRD DAY at Red River National Wildlife Refuge

Saturday, May 2; 8:00am – 3:00pm

Trip Leader – Nancy Menasco – 868-3255 (H); nmcpa@aol.com

Red River Refuge Alliance Website:
www.redriverrefugealliance.org

Celebrate IMBD at the refuge! Doughnuts, shade-grown coffee, hot tea, and hot chocolate will be served in the morning beginning at 8:00 a.m. There will be bird walks, refuge tours, and activities for children. Bring your camera and get a head start on the 2009 Red River National Wildlife Refuge Photo Contest. Bird Walk with Dennis Forshee of the Wild Bird Center begins at 8:30 a.m. Children accompanied by an adult are welcome.

Directions to the refuge: From the intersection of the US 71 (Barksdale Boulevard) and Jimmie Davis Highway (LA 511) in Bossier City, go south about one-half mile on US 71 and turn right (west) on Sunflower Road. Proceed to the end of the road; the gravel/dirt road through the gate across the cattle gap leads into the refuge. The Headquarters Unit is usually closed to the public except for special events, such as the IMBD Celebration.

NORTH AMERICAN MIGRATION COUNT (NAMC)*Saturday, May 9*

Compiler – Hubert Hervey, 925-9249 (H)
 hawkeyehub@att.net

Please contact Hubert prior to the event for forms and instructions. You bird where you want for as long as you want, but be sure to keep separate records for each parish and location you bird. Participants will meet at around 8:00 p.m. for supper and to call the list at a location to be announced.

WILD BIRD CENTER EVENTS**BEGINNER BIRD WALKS**

The Wild Bird Center conducts field trips the first and third Saturday of every month, weather permitting. Meet at Wild Bird Center in the University Place Shopping Center (Target Shopping Center) at the corner of Youree Drive and East 70th Street. Destinations vary according to local sightings and may include local parks, country roads or a private backyard. Loaner binoculars are available. Be sure to bring a field guide.

For more information on any Wild Bird Center event, please call Dennis or Janice Forshee at the Wild Bird Center, 318-797-BIRD (2473).

John James Audubon: American Artist and Naturalist Exhibit**Dates:** Now—April 30, 2009**Location:** Louisiana State Exhibit Museum,
3015 Greenwood Road, Shreveport.**Hours:** Monday—Friday 9 a.m. to 4 p.m. and
Saturday—Sunday noon to 4 p.m.

This is a traveling exhibit that includes 64 of the original prints from Audubon's "Birds of North America" Double Elephant Folio. The prints are part of a 435 hand-colored copperplate engravings set completed from 1826 to 1836 by engravers William Lizars and Robert Havell Jr. Also in the exhibit are some of Audubon's personal belongings, such as photos and letters, which add a biographical aspect to the exhibit. For more information call 318-632-2020. The exhibit is free.

**LOUISIANA ORNITHOLOGICAL SOCIETY (LOS) SPRING MEETING, GRAND ISLE, LA
Friday, April 17 – Saturday, April 18, 2009**

Information and registration forms for the annual spring meeting are or will be available at the Louisiana Ornithological Society (LOS) website at <http://losbird.org/meeting.htm>. LOS will hold its spring meeting in conjunction with the Grand Isle Migratory Bird Festival, which runs from April 16-19. Visit the festival website at <http://grandisle.btneq.org/>. Make your room reservations as soon as possible as they're going fast. For a list of possible accommodations, visit the Grand Isle website:

<http://www.grand-isle.com/lodging.htm>. The Grand Isle Tourist Commission says to inquire about discounts for birders.

The Friday and Saturday night meetings will be held at the Grand Isle Community Center. The Friday night program is "The Albatross: International Conservation Challenge" presented by Robert Doughty. Refreshments will be served. The Saturday night program is "The Louisiana Coast: Worth Seeing, Worth Saving, Worth Celebrating" by Gay Gomez. The presentation will feature highlights from Gay's recently-published book, *The Louisiana Coast: Guide to an American Wetland*. The Saturday night banquet will be catered by the ladies of Grand Isle. Meeting cost is \$10 per person and the banquet is \$20 per person.

Membership in LOS is not required to participate in any of the LOS meetings, but you are encouraged to join to support the activities of our state society. Annual dues are \$20 for a regular membership and \$25 for a family membership. LOS is for birders of all levels, amateur or professional. Three meetings are held each year with programs on Friday and Saturday nights, organized field trips on Saturday and, for the winter meeting, also on Sunday, and a banquet on Saturday night. The spring meeting is usually held the last weekend in April; the fall meeting is the last weekend in October; and the winter meeting is held in different locations around the state, usually the last weekend in January. Baton Rouge Audubon Society will host the January 2010 winter meeting.

THE OWL POEM

© John Dillon 2009

Explanatory note: On Friday, February 13th, 2009, John Dillon was owling at Lake Claiborne State Park. What he discovered there prompted him to call upon four additional birders: Linda Adrion, Terry Davis, Mary Ellen Lewis, and Charlie Lyon. On the night of the 14th, the birders recorded what they initially believed to be credible evidence of a Northern Saw-whet Owl in North Louisiana. What follows is a verse narrative of the events of that night. As of yet, these events remain unexplained and will likely go the way of similar great American folklore, such as bigfoot, the Salem witches and little green men.

Late upon an evening owling did a handsome lad go prowling
 For to call unto him predatory birds of mystery.
 Not the least did he there shudder, for the owls he hoped to flutter
 Down to him where he could mutter
 To them weird and wondrous vespers while the pines were whispering,
 In the dark and inky shadows where the pines were whispering.

The lad he started gently calling as the temperature was falling,
 And the noisy chorus frogs were singing out their hearts' lament.
 Like a screech-owl he was trilling, every second of it thrilling,
 And his soul he thus was spilling
 Out to owls, the feathered watchmen of that night's occult event,
 The silent, lurking, feathered watchmen of that night's occult event.

He sat patiently in darkness, listening to the eerie starkness
 Of the silence that would fall between his little haunting hoots.
 There was no reply of screech-owl, so the lad, in search of new fowl,
 Started calling then for Barred Owl,
 Brawny, deadly, silent bird of prey who calls, "Who cooks for you?"
 Bird of prey of swamps and bogs who loudly calls, "Who cooks for you?"

All expectant thus of hooting, he then heard a sort of fluting,
 Haunting call that echoed through the foggy, starless, moonless night.
 Keenly listening to the haunting little call it seemed a flaunting
 Little owl unmoved by daunting
 Calls of bigger, meaner owls from out the darkness of the night.
 Still the little owl kept calling in the darkness of the night.

The lad, a birder true and practiced, uttered forth at first the crack guess
 Of a Northern Saw-whet Owl upon the premises that night.
 He knew a birder must be thorough, and his brows began to furrow
 From the gentle toned "wooWEEoo"
 That the little owl repeated, but the call, it seemed just right.
 Though confused, the birder knew the call, it really seemed just right.

Anxious, careful and determined, he went home and called two more men
 And two ladies, too, to help locate the Northern Saw-whet Owl.
 On the next night they descended on the place by pines defended,
 These five who so depended
 On the little bird to show, and not to be a secret fowl.
 Just give us a "wooWEEoo" and don't be a secret fowl.

For an hour nothing stirred except a boisterous, bigger bird;
 Just a plain old local Barred Owl gave a loud "Who cooks for you?"
 The birders all were worried that the Saw-whet they had hurried
 To quite possibly had scurried

Off to some more distant place and wouldn't answer, "WooWEEoo."
Such disappointment if the Saw-whet wouldn't answer, "WooWEEoo."

Then, at last the bird called out amid the darkness thereabout.
Vindication for the lad was finally all but sealed away.
Then they started to record the calling of the little bird,
So no one could doubt their word
About the Northern Saw-whet owl; "If we could get it all on tape,"
They said, "No one could ever scoff if we could get it all on tape."

Now, they'd called the little bird in, being absolutely certain
That a Northern Saw-whet Owl had been exactly what they'd heard.
The birders got their voice recordings, but the little owl affording
Them no visual reporting,
One of them suggested now that they should video the bird.
They'd find it in the spotlight, and they'd video the bird.

Earlier the lad discovered that a trail with leaves all covered
Did extend beyond into the forest depths all hid from sight.
The three of them most qualified then went and walked the trail and eyed
each limb above though slim or wide
For the Northern Saw-whet Owl that had been calling all the night.
It was here they'd find the owl that had been calling all the night.

When overhead the owl did seem, an expert member of the team
With ears that hear so well you'd think he might be one-half owl himself
Said a startling, cautious word, "I think that it's a bigger bird,"
But the lad just knew what they had heard
Was a Northern Saw-whet Owl, a little wily, woodsy elf
And the video would show the wondrous, wily, woodsy elf.

With the spotlight he did search and then he found the bird's high perch,
"I think I've got it!" he exclaimed, and the others took a peek.
Then they stood there stupefied, and could scarce believe their eyes,
"It's a Barred Owl!" one then cried.
And the lad could only stare and say, "You're freaking kidding me!
After all this it's a Barred Owl? Man, you're freaking kidding me!"

The lad just couldn't let it end; he said, "Play the call again.
And if the Barred Owl says 'wooWEEoo,' then we'll know that we've been wrong."
They played the call once more and waited, and each birder's breath was bated,
And what they'd not anticipated
Was a Barred Owl that could somehow sing a Northern Saw-whet's song.
The Barred Owl said, "wooWEEoo" like a Northern Saw-whet's song.

So, all you birders then take heed here at the brave, heroic deeds
Of these five friends whose message thus is really anything but moot.
If you're in the woods a walking, and you hear an owl a talking,
He may really just be mocking
You and, even though, you think he likes you, doesn't give a hoot.
You'd think an owl might care about you, but he doesn't give a hoot.

The Owl Poem © John Dillon 2009

Minutes of the Board Meeting
February 3, 2009, 6:30 p.m.
Museum of Life Sciences at LSU

OFFICERS Present

President – Jim Ingold, Vice-president – Mac Hardy

MEMBERS AT LARGE Present

Jerry Bertrand, Rachel Demascal, John Dillon, Bill Hall, Hubert Hervey, Silvierra Hunt, Amanda Lewis, Nancy Menasco, and Rosemary Seidler

COMMITTEE REPORTS

Bird Alert Service – Rosemary Seidler: recently changed server, but everything is working okay.

Bird Records – Mac Hardy: Looking into ebird. Possibly direct ebird entries into BSG database. A discussion of ebird followed.

Field Trip Coordinator – John Dillon: Upcoming field trips include Great backyard bird count, atlasng, Red River Refuge Day, but no March trips yet. LOS Spring meeting will be April 17-19 in Grand Isle. Suggestion of a March scavenger hunt was made. Discussion of possible future trips included: Nicaragua birding at Brad Macpherson's farm; Dolphin Island, the valley around Thanksgiving

Fund Raising – Jerry Bertrand: Items are requested.

Hospitality – Amanda Lewis: The Trahans will bring snacks for the February meeting.

Library – Silvierra Hunt: nothing to report

Membership Secretary – Mac Hardy: 165 memberships including gratis, individual, and family memberships. Suggestion form board to include a notice in the newsletter to check expiration date.

Newsletter Editor – Jim Ingold: Printer can now do first fold in newsletter. Next year Jim requests that someone else serve as editor.

Folding/Mailing Committee– help is needed in this area

Programs – Mac Hardy: suggestion of Jane Patterson. Other possible speakers include: David Wolf, Richard Gibbons, Dave Patton, and Francine Forrester.

Publicity – Rachel Demascal: notice went out for February talk.

Website – Jerry Bertrand: Recent sightings have been updated. Noted that anyone in the BSG can update the website with the password and a short instruction. An ad for t-shirts and patches will be added.

NEW BUSINESS

Bayou Birding Bon Temp: web based event to promote LA birding trails, wildlife management areas, and refuges will take place April 24th-May 3rd. Lists will be added to ebird. Awards will be given for big LA list, Big sit, big location, most locations, and a lagniappe award. Event is to encourage visiting these profiled areas and to build species lists for these areas.

Minutes of the Regular Meeting

February 10, 2009, 6:30 p.m.

Museum of Life Sciences at LSU

Program— Amanda Lewis talked about the Red River Watershed Management Institute and about the research the institute is doing at Bickham Dickson Park and in Caddo Parish.

Field Trips—John Dillon said that the Great Backyard Bird Count would take place this next weekend and the LOS spring meeting will be April 17 and 18 in Grand Isle.

Hospitality—Amanda Lewis reported that Jean Trahan was responsible for refreshments for this meeting and she needs people to take care of the May and June refreshments.

Memberships—Mac Hardy said that there are a total of 166 names on the active mailing list and 67 paid memberships.

Programs—Mac Hardy will make the presentation at the next meeting and that the title of his talk is a secret at this time.

Bird Talk—Jim Ingold reported on his recent field trip to Cheneyville. He said that the group saw about 1,500 **Sandhill Cranes**, more than 10,000 **Snow Geese**, **Greater White-fronted Geese**, four **American Avocets**, several *Plegadis* ibis, and many other species. Larry Raymond spotted a **Red-breasted Nuthatch** at Eddie Jones Park and Bill Wood reported 40 to 60 **Pine Siskins**.

BIRD REPORT – compiled March 3, 2009

Use the bird report to see what other birders have been seeing and where to go find the bird you want to see. Observers are abbreviated by the first and last initials. Dates and localities of observations are summarized under the observer’s initials. Sightings are arranged by species. Following each species is a line of data in the following format: date, initials of the observer, number of birds observed, initials of another observer, number of birds they observed, etc. For the number of birds observed, a 1 is used for both 1 bird and for numbers not reported by the observer. For example: 01/12/99 BB 2 means that on January 12, 1999, BB saw two birds. Then by looking on the observer list, located after the sightings, you can determine that BB is Bob Birder and on 1/12/99 he was birding C. Bickham Dickson Park.

Report bird records for the newsletter to Mac Hardy by the 15th of each month. All bird records reported here are observations of the observers and are therefore the responsibility of the observer.

-
- Greater White-fronted Goose** -- 02/09/2009 JT,RS,TD 20

Shreveport Society for Nature Study
BIRD STUDY GROUP
NEWSLETTER

Volume 23, Number 08

April 7, 2009

Next Meeting – April 14, 2009
THE SPORT OF KINGS
BY Francine Forrester, Master Falconer

APRIL PROGRAM

When: Tuesday, April 14, 2009, 6:00 p.m.

Where: LSU in Shreveport Museum of Life Sciences

Speaker: Come and learn about the “Sport of Kings” falconry. Listen to a master falconer explain how she catches, trains and hunts with these amazing birds of prey. See one of her hawks up close and personal.

NORTH AMERICAN MIGRATION COUNT (NAMC)

Saturday, May 9

Compiler – Hubert Hervey, 925-9249 (H)
hawkevehub@att.net

WILD BIRD CENTER EVENTS

BEGINNER BIRD WALKS

Saturday, April 18 and May 9

UPCOMING FIELD TRIPS AND EVENTS

By John Dillon

All field trips will **DEPART** from the listed meeting place at the time posted. Be early at the meeting place for orientation information and carpooling. BSG Membership is not a requirement for participation in any field trip, but it is encouraged.

What to bring: binoculars, field guide, scope (if possible), snacks/drinks for yourself and pen/paper if you'd like to keep your own records of sightings.

APRIL

LOS SPRING MEETING – GRAND ISLE

Friday, April 17- Sunday, April 19

Information and registration forms for the annual spring meeting are or will be available at the LOS website at <http://losbird.org/meeting.htm>. LOS will hold its spring meeting in conjunction with the Grand Isle Migratory Bird Festival, which runs from April 16-19. You are encouraged to visit the festival website at <http://grandisle.btneq.org/>. Make your room reservations as soon as possible because they're going fast. For a list of possible accommodations, visit the Grand Isle website at <http://www.grandisle.com/lodging.htm>. The Grand Isle Tourist Commission says to inquire about discounts for birders.

The Friday and Saturday night meetings will be held at the Grand Isle Community Center. The Friday night program is "The Albatross: International Conservation Challenge" presented by Robert Doughty. Refreshments will be served. The Saturday night program is "The Louisiana Coast: Worth Seeing, Worth Saving, Worth Celebrating" by Gay Gomez. The presentation will feature highlights from Gay's recently-published book, *The Louisiana Coast: Guide to an American Wetland*. The Saturday night banquet will be catered by the ladies of Grand Isle. Meeting cost is \$10 per person and the banquet is \$20 per person.

Membership in LOS is not required to participate in any of the LOS meetings, but you are encouraged to join to support the activities of our state society. Annual dues are \$20 for a regular membership and \$25 for a family membership. LOS is for birders of all levels, amateur or professional. Three meetings are held each year with programs on Friday and Saturday nights, organized field trips on Saturday and, for the winter meeting, also on Sunday, and a banquet on Saturday night. The spring meeting is usually held the last weekend in April; the fall meeting is the last weekend in October; and the winter meeting is held in different locations around the state, usually the last weekend in January. Baton Rouge Audubon Society will host the January 2010 winter meeting.

MAY

INTERNATIONAL MIGRATORY BIRD DAY at Red River National Wildlife Refuge

Saturday, May 2; 8:00am – 3:00pm

Trip Leader – Nancy Menasco – 868-3255 (H); nmcpa@aol.com

Red River Refuge Alliance Website:

www.redriverrefugealliance.org

Celebrate IMBD at the refuge! Doughnuts, shade-grown coffee, hot tea, and hot chocolate will be served in the morning beginning at 8:00 a.m. There will be bird walks, refuge tours, and activities for children. Bring your camera and get a head start on the 2009 Red River National Wildlife Refuge Photo Contest. Bird Walk with Dennis Forshee of the Wild Bird Center begins at 8:30 a.m. Children accompanied by an adult are welcome.

Directions to the refuge: From the intersection of the US 71 (Barksdale Boulevard) and Jimmie Davis Highway (LA 511) in Bossier City, go south about one-half mile on US 71 and turn right (west) on Sunflower Road. Proceed to the end of the road; the gravel/dirt road through the gate across the cattle gap leads into the refuge. The Headquarters Unit is usually closed to the public except for special events, such as the IMBD Celebration.

NORTH AMERICAN MIGRATION COUNT (NAMC)

Saturday, May 9

Compiler – Hubert Hervey, 925-9249 (H) hawkeyehub@att.net

Please contact Hubert prior to the event for forms and instructions. You bird where you want for as long as you want, but be sure to keep separate records for each

parish and location you bird. Participants will meet at Larry Raymond's house after birding to eat and to call the list. Larry and his wife will provide the food. The address is 6675 North Park Circle.

Take LA 1 North to LA 538 (Old Mooringsport Road). Turn west between the MacDonaldis and Exxon Station. Continue approximately 2.5 miles on LA 538 past Northwood High School, Fire District 1 Station, Donnie Bickham School and Wasson Road to North Park Drive. Turn left between the brick entrance on North Park Drive. Go 0.1 mile and turn left again on North Park Circle. The house is the 7th house on the left just as you come out of the curve. Alternately, take LA 173 (Shreveport Blanchard Highway) to LA 538 (Old Mooringsport Road). Turn east on LA 538 and continue 0.9 miles to North Park Drive. Turn right between the brick entrance and continue as above.

WILD BIRD CENTER EVENTS

BEGINNER BIRD WALKS

The Wild Bird Center conducts field trips the first and third Saturday of every month, weather permitting. Meet at Wild Bird Center in the University Place Shopping Center (Target Shopping Center) at the corner of Youree Drive and East 70th Street. Destinations vary according to local sightings and may include local parks, country roads or a private backyard. Loaner binoculars are available. Be sure to bring a field guide.

For more information on any Wild Bird Center event, please call Dennis or Janice Forshee at the Wild Bird Center, 318-797-BIRD (2473).

The BSG Goes to Barksdale

By John Dillon

For the first time in ten years, the BSG held a field trip to the 22,000 acre East Reserve at Barksdale Air Force Base. The trip is quite well attended, but we called it short due to cold, windy weather. Those who decided to tough out the 40 degree weather and 15-20 mph winds were Linda Adrion, John Dillon, Jacque Falkenstine, Mary Ellen Lewis, Carolyn Phillips, Larry Raymond, Rosemary Seidler, Jean and Jeff Trahan, and Mark Wilson. Our BAFB contact was Carol Shelton, wife of retired airman, Jim Shelton.

From 7:15 AM to 10:30 AM, we tallied a list of 40 species (see total list at bottom). For those who have never been to the East Reserve before, there is an extensive amount of mature hardwood forest. You can literally drive for 4 or 5 miles and not see a single pine

tree. Unfortunately, the best habitats were closed for the day due to turkey season.

We began the morning on the far east end of the reserve and worked our way west back to Flag Lake. Initially, we had few birds at the small Harmon Lake which is surrounded by mixed pine and hardwoods. The highlight birds there were the only **Brown Creeper** for the day, a **Northern Parula**, and a soaring adult **Bald Eagle**, spotted by new birder, Carolyn Phillips.

After birding similar habitat and seeing all similar species, we stopped at a gas well on the side of the road that was adjacent to mature hardwood habitat. There, we picked up **Red-tailed Hawk**, **Red-headed Woodpecker**, **Yellow-throated Vireo**, **Blue-gray Gnatcatcher**, **Black-and-white Warbler** and added another **Northern Parula**.

Our next stop was at a flooded slough where we picked up **Eastern Phoebe**, **White-eyed Vireo** and two **Orange-crowned Warblers**. The warblers were chasing each other, and several of us were able to catch a rare glimpse of the orange crown.

Finally, we stopped at Flag Lake, the largest lake at BAFB. We gained an additional **Bald Eagle**, another **White-eyed Vireo**, and another **Northern Parula**. New birds included a pair of **Snowy Egrets**, a few dozen **Tree Swallows**, **Northern Rough-winged Swallow**, **Barn Swallow**, and a singing **Yellow-throated Warbler** first heard by Larry Raymond.

Complete Trip List:

Wood Duck
 Pied-billed Grebe
 Double-crested Cormorant
 Great Egret
 Snowy Egret
 Little Blue Heron
 Cattle Egret
 Turkey Vulture
 Bald Eagle
 Red-tailed Hawk
 Killdeer
 Red-headed Woodpecker
 Red-bellied Woodpecker
 Eastern Phoebe
 White-eyed Vireo
 Yellow-throated Vireo
 Blue Jay
 American Crow
 Tree Swallow

Northern Rough-winged Swallow
 Barn Swallow
 Carolina Chickadee
 Tufted Titmouse
 Brown Creeper
 Carolina Wren
 Ruby-crowned Kinglet
 Blue-gray Gnatcatcher
 Eastern Bluebird
 Cedar Waxwing
 Orange-crowned Warbler
 Northern Parula
 Yellow-throated Warbler
 Pine Warbler
 Black-and-White Warbler
 Swamp Sparrow
 White-throated Sparrow
 Northern Cardinal
 Common Grackle
 American Goldfinch

A Garganey is Cameron Parish
By Jay Huner

I was birding in the northern part of Cameron Parish Saturday, 29 March 2009 around 3:50 PM CDST when I stopped to look at dowitchers in a newly flooded, but not planted ricefield along Arceneaux Road. The site was about 0.1 mile south of its intersection with Pine Pasture Road on the right - east side - of the road. There were three teal with the dowitchers, I noticed that one was different and subsequently determined that it was a Garganey. I later learned that the species had never been reported in Louisiana but the few reports from the southern region came at this time of year with a mass northward movement of Blue-winged Teal. I am very gratified that several far more experienced birders than me have accepted that I did, in fact, find a Garganey. I regret that I did not have a camera and that others have been unable to relocate the bird.

Details about the observation follow.

The Garganey had a distinct white band/supercillium that extended from the forehead above the eye onto the neck. It was very distinct but narrower than what I found in the various field guides and web images I consulted. The bird was swimming diagonally away from me and was very nervous. It was about 20 yards from me. I now assume that because the duck was hunkered down, the stripe would not be as prominent as it would be if it were alert and holding its head up. The head color was consistent with the reddish brown/reddish orange color

on a male Green-winged Teal's face. It did not have a crest but a rounded head like the two nearby Blue-winged Teal. It was similar in size to those teal.

My camera was at home. Without a camera, I clearly made a very basic mistake by diving for my field guide rather than watching the bird for as long as possible and the trying to see where it went when it flushed. I opened to the Green-winged Teal page with Baikal Teal. I was thinking Garganey but simply do not know why. The bird was gone. I pulled up about 10 yards and parked in a turn out at a gate. That's when I checked the index and found Garganey on the Blue-winged Teal page. I just never anticipated finding an odd-ball teal.

I was focusing on the adjacent dowitcher flock looking for other shorebirds figuring a phalarope might be present considering water depth - up on the dowitchers' sides. I just happened to look at the three teal. I thought drake Green-winged Teal based on head color at first but saw no green and the white stripe just imprinted in my mind. Green-winged Teal don't have white stripes from their foreheads onto their necks. That's about the time I dove for the field guide without getting more details on the body. There should be a color difference between the crown and the face. I may have noticed it but the white stripe is what I focused on.

Audubon Sponsors the Nature of Agritourism
Workshop in Southeastern Arkansas

By Jay Huner

DeWitt, Arkansas was the venue for the 8-12 February 2009 Nature of Agritourism Workshop organized by Ms. Kathy Radomski, Director of Business and Industry Training at Phillips Community College of the University of Arkansas. Agritourism has varied definitions but generally refers to nature tourism associated with agricultural and forestry properties, especially those in private ownership. Birding, as a source of income in public and private situations, was strongly emphasized.

Approximately 30 participants hailed from Arkansas, Louisiana, Mississippi, and Missouri. Well informed instructors came from Arkansas, Mississippi, and Texas. A discussion of the topics and their presenters follows. Participants and instructors were housed in private hunting lodges associated with Arkansas County's intensive waterfowl and deer hunting industry. Lodge managers and owners are evaluating ways to extend their offerings to cover periods outside the fall-winter hunting seasons. Field trips were made to various lodges ranging

from high end to modest, the White River National Wildlife Refuge of Ivory-billed Woodpecker fame and the Stuttgart, Arkansas community museum.

Participants learned about topics such as how Texas has been so successful with its Nature Tourism industry, wildlife management, liability, hospitality, marketing, understanding birders, interpretation, photography, Dutch oven cooking, youth involvement, asset mapping, business and financial planning, technical resources, and partnerships.

I found presentations made by Dr. Dan Scheiman, Audubon Arkansas, of special interest because of my personal interest in birding and associated ecotourism activities. Only about a quarter of the presenters and participants were birders. So, Dan's presentations explaining birding and birders were especially good follow ups to earlier presentations by Shelly Plante who provided examples of commercial agritourism ventures in southern Texas that incorporated birding as an integral component of their offerings to visitors. Shelly is Nature Tourism Coordinator for the Texas Parks and Wildlife Department, the agency that was responsible for developing the concept of birding trails in the USA. Dan pointed out that identifying birding resources on personal property as well as easily accessible nearby resources was very important to provide accurate information for potential visitors (clients).

Lodges involved in the workshop included Fowl Play Lodge, Five Oaks Lodge, and Bayou Lagrue Lodge. A tour of the impoundments at the Five Oaks Lodge permitted viewing numerous waterfowl in the company's numerous working wetland impoundments. Dominant duck was Northern Shoveler but Gadwall, Mallard, Blue-winged and Green-winged Teal, Northern Pintail, Canvasback, Ring-necked Duck, Ruddy Duck and Bufflehead along with Greater White-fronted and Snow Goose were present. There wasn't much time to bird in riparian areas but a flock of over 400 Rusty Blackbirds, a species showing an alarming decline in numbers, treated birders to good views in a sloppy wet impoundment, typical habitat for the species. The presence of the rustys gave Dr. Dan an opportunity to discuss wildlife conservation of non-game species in such managed working wetland systems to the non-bird oriented participants.

While the elusive Ivory-billed Woodpecker is a draw for the DeWitt area, other specialty birds include wintering Smith's Longspurs, Red-cockaded Woodpecker, and Yellow Rail. In fact, one lecture by Ms. Pat Peacock dealt with the origins and development of the World Championship Duck Calling Contest in Stuttgart, Arkansas. Pat was a genial presenter and a past woman's world duck calling champion. This tied into Dan's

presentation the following morning because the Stuttgart Airport is home to wintering Smith's Longspurs. The airport manager works with birders and several groups including one from Connecticut come to Stuttgart each winter to hunt longspurs with cameras, scopes, and binoculars rather than Mallards and Wood Ducks with shotguns.

One point emphasized over and over again was that residents of an area become complacent about their everyday worlds. As a result, they do not realize that they have interesting stories and intriguing vistas to share with visitors. Harvesting ricefields and viewing rails exposes visitors to habitat, potentially new birds including Yellow Rail, and a new way of life. The uniqueness of one's surroundings was highlighted with seminars on storytelling and interpretation by Matt Conner, White River NWR Ranger. His various presentations included a wetland habitat version of the Jeopardy Game following his wetland seminar and a Dutch oven cooking short course.

Individuals or firms considering becoming involved in agritourism need to remember the principal of three, three and a bed. This refers to three activities, three meals and a place to spend the night. This is the same thing most hosts have to consider when entertaining visitors and tourism, in the end, is all about entertaining visitors.

Agritourism is a form of business and needs to be treated as such. That is why topics like insurance, business plans, and marketing have to be addressed. All were made most interesting by the various presenters. The bulletins, guides, and printed materials provided to participants cover basically all aspects of developing successful agritourism ventures. Persons interested in learning more about agritourism and the workshop may contact Ms. Kathy Radomski at: Phillips Community College of the University of Arkansas, P. O. Box 427, DeWitt, Arkansas 72042 kradomski@pccua.edu / 870 946-3506

Dr. Dora Ann Hatch is a rural development specialist with the LSU Agricultural Center and can provide assistance to Louisiana residents in developing agritourism ventures. Dr. Hatch participated in the Arkansas workshop. She has published a bulletin entitled "A New Agricultural Business Enterprise – Agritourism," Publication AC-5, October 2008, LSU Agricultural Center, Baton Rouge, LA. Any Parish (County) Agent with the LSU Cooperative Extension Service can secure copies of Dr. Hatch's publication for readers. Dr. Hatch is stationed in Homer, Louisiana and may be contacted at 318 927-9654 ext. 229; dhatch@agcenter.lsu.edu.

The workshop was made possible by grants from the Southern SARE (US Department of Agriculture), and the Lower Mississippi Delta Region Initiative (National Park Service), and partnerships with Audubon Arkansas and the University of Arkansas Cooperative Extension Service. Those contemplating organizing similar workshops elsewhere might consider seeking funding through multiple agencies as did the Arkansas organizers of the DeWitt workshop.

Note: For birders reading this report, I managed to find over 70 birds during the workshop despite having little time to actually doing any birding. Nope, I did not manage to get to the Stuttgart Airport for Smith's Longspur but did add about 15 new birds to my Arkansas list, now at 100, and a Barn Owl was a new 2009 Year Bird.

Minutes of the Regular Meeting

March 10, 2009, 6:30 p.m.

Museum of Life Sciences at LSUS

Program -- Mac Hardy made the presentation "The Secret Lives of Animals--Exposed." He showed photos of animals taken while using motion actuated cameras during research attempts to find ring-tailed cats in this area.

Treasurer's Report – Jean Trahan reported that as of February 28, 2009, the club had \$5,363.44 cash in the bank, \$295.39 at the post office for mailing newsletters, and \$402.30 at the LSUS printing office for printing newsletters. The total assets are then \$6,061.13.

Bird Records – Mac Hardy reported that many records were submitted this last month and that we should keep up the good work and continue to submit records.

Programs -- Francine Forester will speak at the next meeting about hawks.

Science Fair – Linda Adrion judged projects at the regional science fair related to birds. She declared a winner who will make a presentation at a future meeting.

Hospitality—Amanda Lewis reported that Mac Hardy provided refreshments for this meeting. She said that we need someone to volunteer to provide refreshments at the next meeting.

Board – Jim Ingold reported that there are seven positions to be filled on the board for next year.

Bird Talk—Jim Ingold reported a **Bald Eagle** recently seen over LSUS property. ME Lewis said that she had her first hummingbird at her house last Sunday. Nancy Menasco recently saw two **Bald Eagles** at the Red River NWR, Headquarters. Amanda Lewis spotted two **Red-breasted Mergansers** at Bickham Dickson Park. John Dillon took photos of a **Louisiana Waterthrush** that he saw yesterday.

BIRD REPORT – *compiled April 6, 2009*

Use the bird report to see what other birders have been seeing and where to go find the bird you want to see. Observers are abbreviated by the first and last initials. Dates and localities of observations are summarized under the observer's initials. Sightings are arranged by species. Following each species is a line of data in the following format: date, initials of the observer, number of birds observed, initials of another observer, number of birds they observed, etc. For the number of birds observed, a 1 is used for both 1 bird and for numbers not reported by the observer. For example: 01/12/99 BB 2 means that on January 12, 1999, BB saw two birds. Then by looking on the observer list, located after the sightings, you can determine that BB is Bob Birder and on 1/12/99 he was birding C. Bickham Dickson Park.

Report bird records for the newsletter to Mac Hardy by the 15th of each month. All bird records reported here are observations of the observers and are therefore the responsibility of the observer.

Wood Duck -- 03/02/2009 RL 2

Ring-necked Duck -- 03/04/2009 RL 8

Lesser Scaup -- 03/04/2009 RL 15

Double-crested Cormorant -- 03/04/2009 RL 130

Great Blue Heron -- 03/02/2009 RL 1; 03/04/2009 RL 1

Black Vulture -- 03/04/2009 RL 1; 03/26/2009 RS 5

Turkey Vulture -- 03/02/2009 RL 2; 03/04/2009 RL 2; 03/26/2009 RS 8

Sharp-shinned Hawk -- 03/02/2009 RL 1; 03/26/2009 RS 1

Cooper's Hawk -- 03/02/2009 RL 1

Red-shouldered Hawk -- 03/02/2009 RL 2; 03/26/2009 RS 2

Broad-winged Hawk -- 03/26/2009 RS 1

Red-tailed Hawk -- 03/02/2009 RL 1; 03/26/2009 RS 2

American Coot -- 03/04/2009 RL 120

Sandhill Crane -- 03/02/2009 RL 32

Ring-billed Gull -- 03/04/2009 RL 52

Rock Pigeon -- 03/04/2009 RL 8

Mourning Dove -- 03/02/2009 RL 8; 03/04/2009 RL 1; 03/26/2009 RS 3

Greater Roadrunner -- 03/30/2009 RS 2

Barred Owl -- 03/02/2009 RL 4

Ruby-throated Hummingbird -- 03/26/2009 RS 2

Red-bellied Woodpecker -- 03/02/2009 RL 4; 03/26/2009 RS 4

Yellow-bellied Sapsucker -- 03/02/2009 RL 1

Downy Woodpecker -- 03/02/2009 RL 2; 03/26/2009 RS 3

Hairy Woodpecker -- 03/02/2009 RL 1

Northern Flicker -- 03/02/2009 RL 3; 03/04/2009 RL 2; 03/26/2009 RS 2

Pileated Woodpecker -- 03/02/2009 RL 2

Eastern Phoebe -- 03/02/2009 RL 1; 03/26/2009 RS 2

White-eyed Vireo -- 03/26/2009 RS 17

Yellow-throated Vireo -- 03/26/2009 RS 1

Red-eyed Vireo -- 03/26/2009 RS 2

Blue Jay -- 03/02/2009 RL 6; 03/26/2009 RS 9

American Crow -- 03/02/2009 RL 4; 03/04/2009 RL 2; 03/26/2009 RS 16

Fish Crow -- 03/02/2009 RL 3; 03/04/2009 RL 2; 03/26/2009 RS 2

Purple Martin -- 03/04/2009 RL 3; 03/26/2009 RS 4

Carolina Chickadee -- 03/02/2009 RL 2; 03/26/2009 RS 11

Tufted Titmouse -- 03/02/2009 RL 2; 03/26/2009 RS 26

White-breasted Nuthatch -- 03/02/2009 RL 2; 03/26/2009 RS 1

Carolina Wren -- 03/02/2009 RL 2; 03/26/2009 RS 2

Ruby-crowned Kinglet -- 03/02/2009 RL 1; 03/26/2009 RS 2

Blue-gray Gnatcatcher -- 03/26/2009 RS 5

Eastern Bluebird -- 03/02/2009 RL 2; 03/04/2009 RL 12; 03/26/2009 RS 7

American Robin -- 03/04/2009 RL 6

Northern Mockingbird -- 03/04/2009 RL 4; 03/26/2009 RS 10

Brown Thrasher -- 03/02/2009 RL 3; 03/26/2009 RS 2

European Starling -- 03/04/2009 RL 3; 03/26/2009 RS 7

Cedar Waxwing -- 03/26/2009 RS 8

Orange-crowned Warbler -- 03/26/2009 RS 1

Northern Parula -- 03/26/2009 RS 2

Yellow-rumped Warbler -- 03/26/2009 RS 4

Pine Warbler -- 03/02/2009 RL 2; 03/26/2009 RS 58

Black-and-white Warbler -- 03/26/2009 RS 8

Common Yellowthroat -- 03/26/2009 RS 2

Hooded Warbler -- 03/26/2009 RS 3

Eastern Towhee -- 03/26/2009 RS 3

Chipping Sparrow -- 03/02/2009 RL 3; 03/26/2009 RS 32

Field Sparrow -- 03/02/2009 RL 10

Song Sparrow -- 03/26/2009 RS 2

Swamp Sparrow -- 03/26/2009 RS 3

White-throated Sparrow -- 03/02/2009 RL 7; 03/04/2009 RL 8; 03/26/2009 RS 31

Dark-eyed Junco -- 03/02/2009 RL 17; 03/26/2009 RS 15

CONFESSIONS OF AN OBSESSED HUMMINGBIRDER

BY Nancy Newfield

MAY PROGRAM

NOTE CHANGE OF TIME AND PLACE!

When: Tuesday, April 12, 2009, 6:30 p.m.

Where: LSU in Shreveport Science Lecture Auditorium

Speaker: Nancy L Newfield, co-author of Hummingbird Gardens, presents a fascinating photographic story detailing her more than 30 years of study and adventure in pursuit of the world's smallest birds. Nancy began studying hummingbirds in 1975 and pioneered the practice of landscaping to provide natural food sources for them. She thus learned the best ways to attract them to any garden. Her major study has concerned the discovery and documentation of hummingbird populations that spend the non-breeding season in southern Louisiana rather than the traditional tropical region. She handles 400-500 hummers of 8-9 species each winter as part of the study, which began as a 5-year project in 1979 and is now in its 29th year. At the time of the initiation of the project, only 11 other people were federally permitted to band hummingbirds. Now, nearly 30 years later, Newfield is the most senior hummer bander in the United States and Canada. Including

breeding season and demonstration banding, Newfield has banded more than 18,000 hummingbirds of 15 species in Louisiana, Mississippi, Texas, and Arizona. She has authored 4 books as well as more than 250 papers and articles. Newfield delivers 30 or more lectures annually and, until her recent retirement, she organized birding tours to Central and South America through her HummerQuest. She presents her amazing program detailing her more than 30 years of study and adventure in pursuit of the world's smallest birds.

UPCOMING FIELD TRIPS AND EVENTS

By John Dillon

All field trips will **DEPART** from the listed meeting place at the time posted. Be early at the meeting place for orientation information and carpooling. BSG Membership is not a requirement for participation in any field trip, but it is encouraged.

NORTH AMERICAN MIGRATION COUNT (NAMC)

Saturday, May 9

Compiler – Hubert Hervey, 925-9249 (H)
hawkeyehub@att.net

Please contact Hubert prior to the event for forms and instructions. You bird where you want for as long as you want, but be sure to keep separate records for each parish and location you bird. Participants will meet at Larry Raymond's house after birding to eat and to call the list. Larry and his wife will provide the food. The address is 6675 North Park Circle.

Take LA 1 North to LA 538 (Old Mooringsport Road). Turn west between the McDonalds and Exxon Station. Continue approximately 2.5 miles on LA 538 past Northwood High School, Fire District 1 Station, Donnie Bickham School and Wasson Road to North Park Drive. Turn left between the brick entrance on North Park Drive. Go 0.1 mile and turn left again on North Park Circle. The house is the 7th house on the left just as you come out of the curve. Alternately, take LA 173 (Shreveport Blanchard Highway) to LA 538 (Old Mooringsport Road). Turn east on LA 538 and continue 0.9 miles to North Park Drive. Turn right between the brick entrance and continue as above.

WILD BIRD CENTER EVENTS

BEGINNER BIRD WALKS

The Wild Bird Center conducts field trips the first and third Saturday of every month, weather permitting. Meet at Wild Bird Center in the University Place

Shopping Center (Target Shopping Center) at the corner of Youree Drive and East 70th Street. Destinations vary according to local sightings and may include local parks, country roads or a private backyard. Loaner binoculars are available. Be sure to bring a field guide.

For more information on any Wild Bird Center event, please call Dennis or Janice Forshee at the Wild Bird Center, 318-797-BIRD (2473).

Minutes of the Regular Meeting

April 14, 2009, 6:30 p.m.

Museum of Life Sciences at LSU

Program – Francine Forrester presented the program “Observations of a bird of prey through the eyes of a falconer.”

Field Trips—Jim Ingold said that the annual North American Migration Count would take place May 9, and that the spring LOS meeting will be held at Grand Isle on April 17-19.

Hospitality—Jim Ingold said that that Nancy Newfield would speak at the May meeting which will be held in the Science Lecture Hall because of the crowd it is expected to draw. We will need additional refreshments because of the larger attendance.

Programs—Mac Hardy said that Cliff Shackelford, a Texas Parks and Wildlife biologist, will speak at the meeting on June 9. Mac also reported that he and Francine Forrester will be presenting a program at the Louisiana State Exhibit Museum for the John James Audubon program there. He needs a volunteer for Thursday night to hand out promotional materials for the club. Mac will talk about the BSG.

Board Elections--Jim Ingold said that the terms of five board members will expire and will have to be replaced. Those board members leaving are Silviera Hunt Amanda Lewis, Jim Ingold, Jeff Trahan and Jean Trahan. Jim Ingold and Silviera Hunt have volunteered to serve another term. Therefore, three new board members will be needed.

Donation—Larry Raymond said that the board made a donation of \$100 to the Minden High Nature Club. He thought that that wasn't enough and that the club should increase the donation to a total of \$250. He then made a motion to donate an additional \$150 to the club. The motion was approved.

Bird Talk—Phil Bradley reported 60 **Pine Siskins** present at one time at his house in Spring Ridge. He said that the **American Goldfinches** are in full breeding plumage and that he has not seen one **House Sparrow** in five years. Hubert Hervey said that he saw **American Golden Plovers, Lesser Yellowlegs, and Greater Yellowlegs** on the Red River Friday. He still has four **Harris' Sparrows** coming to his feeders. He said that if they remain until tomorrow, that would be a late date for this species. Linda Adrion saw a **White-winged Dove** at Lock and Dam #5 on March 19. Jim Ingold banded an **Ovenbird** at his banding location in east Texas.

MINUTES OF THE BOARD MEETING

April 7, 2009

Museum of Life Sciences at LSUS

Board members participating in the meeting were Mac Hardy, Jeff Trahan, Jim Ingold, and Hubert Hervey, John Dillon, Jean Trahan, Rosemary Seidler, and Silviera Hunt. Also present were Larry Raymond and Kelly Wells.

Bird Records—Mac Hardy reported a very light turnout for submission of records this month. He is exploring the possibility of getting an account for the BSG on eBird.

Field Trips—John Dillon said that Barksdale AFB will allow the club to do the summer and winter bird atlases on the base.

Newsletter—Jim Ingold said that the newsletter was ready to be mailed tomorrow morning and that he would not edit the newsletter next year.

Programs – Mac Hardy reported that Francine Forrester would give the presentation at the regular meeting next week. Nancy Newfield will give a program about hummingbirds on May 12. Also, Cliff Shackelford, a Texas Parks and Wildlife biologist, will speak on June 9.

Birding Festival—Kelly Wells, the Vice President of Tourism Marketing from the Shreveport-Bossier Convention & Tourist Bureau, discussed the possibility of a Caddo Lake Birding Festival. He said that a spring festival would be best and that he could help with advertising and marketing. No conclusions were reached.

Board Elections—Jim Ingold said that the terms of five board members will expire and will have to be replaced. Those board members leaving are Silviera Hunt Amanda

Lewis, Jim Ingold, Jeff Trahan and Jean Trahan. Jim Ingold and Silviera Hunt have volunteered to serve another term. Therefore, three new board members must be found. Rosemary Seidler and Mac Hardy were selected as a nominating committee to find three club members to serve on the board. Mac Hardy will be the committee chair.

Donation—John Dillon asked for \$100 a donation for the Minden High Nature Club. Rosemary Seidler moved that the club donate the money to the club. The board approved the donation.

Next Meeting – June 9, 2009

**Do Hummingbirds Really Ride on the Backs of Geese:
Some of the Most Commonly Asked Questions and
Answers on Birds.
BY Dr. Cliff Shackelford**

JUNE PROGRAM

When: Tuesday, June 9, 2009, 6:00 p.m.

Where: LSU in Shreveport Museum of Life Sciences

Speaker: Dr. Shackelford is a 5th generation Texan and started bird watching at the age of nine. He made his first tropical birding trip at the age of 17 to Peru where he spent a few days birding with the late Ted Parker. Several birding trips later, at the age of 21, Cliff saw the 1,000th species on his world life list. He published his first bird book, *Hummingbirds of Texas*, at the age of 37. He received both a B.S. and an M.S. degree in biology with an emphasis in avian ecology from Stephen F. Austin State University in Nacogdoches. His Master's thesis dealt with the habitat characteristics of 5 species of woodpeckers.

Cliff is the statewide Nongame Ornithologist for the Texas Parks and Wildlife Department where he's been employed for over 12 years. Cliff has authored about 60 publications on birds and birding. Over a dozen of these are peer-reviewed papers mainly on woodpeckers, raptors, and migratory landbirds in journals like *The Wilson Bulletin*, *The Journal of Raptor Research*, *The Southwestern Naturalist*, the *Bulletin of the Texas*

Ornithological Society, and more. He and his wife, Julie, and their 2 young children live in Nacogdoches, Texas. Julie works for a non-profit land conservation organization called *The Conservation Fund* where she buys land to add to existing refuges and parks like Caddo Lake and The Big Thicket. They also have a busy garage hobby of building screech owl boxes known as *Owl Shacks*.

UPCOMING FIELD TRIPS AND EVENTS

By John Dillon

SUMMER

It's time again for the BSG's usual summer hiatus from field trips. However, we still have a few important birding opportunities you don't need to miss out on.

LSU's Summer Bird Atlas June 1 – July 15, 2009

A Swift Night Out August 7 – 9; September 11 – 13.

UPCOMING FIELD TRIPS AND EVENTS

By John Dillon

All field trips will **DEPART** from the listed meeting place at the time posted. Be early at the meeting place for orientation information and carpooling. BSG Membership is not a requirement for participation in any field trip, but it is encouraged.

What to bring: binoculars, field guide, scope (if possible), snacks/drinks for yourself and pen/paper if you'd like to keep your own records of sightings.

WILD BIRD CENTER EVENTS BEGINNER BIRD WALKS

The Wild Bird Center conducts field trips the first and third Saturday of every month, weather permitting. Meet at Wild Bird Center in the University Place Shopping Center (Target Shopping Center) at the corner of Youree Drive and East 70th Street. Destinations vary according to local sightings and may include local parks, country roads or a private backyard. Loaner binoculars are available. Be sure to bring a field guide.

For more information on any Wild Bird Center event, please call Dennis or Janice Forshee at the Wild Bird Center, 318-797-BIRD (2473).

MANAGEMENT OPPORTUNITIES FOR BIRDS ALONG RED RIVER

By Hubert Hervey

Nearly fifteen years have elapsed since the J. Bennett Johnson Waterway Navigation was completed with the closing of the locks at Lock and Dam 5, about 30 miles downstream from Shreveport, LA. The members of the Shreveport Bird Study Group have enjoyed watching the increase in numbers and species of birds that use the increased water habitats of these riverine lakes. Our database indicates the increased presence of formerly rare or uncommon species such as: Red-necked Grebe,

many ducks, Common Moorhen, Purple Gallinule, Brown Pelican, Magnificent Frigatebird, Sooty Tern, Black Skimmer, Sabine's Gull, Laughing Gull, Tricolored Heron, and Great-tailed Grackle. Improved access to all areas of the Red River now makes birding opportunities available to nearly everyone. We enjoy this natural bounty, with very little attempt to improve habitat for birds beyond what is happening with little effort or expense. The Red River National Wildlife Refuge (USF&WS), and Bayou Pierre WMA (LDW&F) are noteworthy exceptions. I would appreciate if land owners who have managed their Red River lands for the benefit of birds would contribute articles to this newsletter so that we might all gain from what they are learning about managing for birds. The next two paragraphs contain suggestions for improving birding habitat utilizing public organizations.

There is currently an opportunity for organizations with varied primary interests, all connected with the Red River, to join together for the overall good of the environment, and create features to benefit wildlife and people. We need to encourage this initiative! An endangered subspecies, the Interior Least Tern, nests on sandy islands of the Red River; and it has greater success on islands than on sand bars connected to the shore. Osprey has nested on Black Lake in northern Natchitoches Parish. Recently delisted, the Southern Bald Eagle currently nests in several locations in northwestern Louisiana, and can be seen in every month along the river. The endangered Piping Plover passes through the Red River Valley during migration. All these species can be helped with management procedures designed to meet their specific needs. Bald Eagles have nested on platforms in the Tennessee River Valley. Ospreys have readily taken to nesting platforms in other areas. A properly constructed tower might attract either of these fish eating species to nest along the river. This tower could even be placed so it would be visible from the USACE Exhibit Building at Grand Ecore near Natchitoches. Piping Plovers would benefit from management to encourage sandy shorelines clear of vegetation. Specific ideas for helping our nesting Least Terns follow in the next paragraph.

Least Terns nested on islands between River Mile Markers (MM) 219 and 222, on both the east and west sides of the river in recent years. They no longer nest in these locations because of rapid growth of vegetation, which is not scoured from the surface in the pool portions of the river. At Curtis Revetment (MM219) an island could be dredged from sandy or gravel material (not muck) and maintained free of vegetation by mechanical or chemical control. Such a location would attract nesting Least Terns and prove to be a rare

spectacle for visitors to the Headquarters Unit of the RRNWR. Across the river at Eagle Bend Revetment, islands adjacent to the LSUS Water Research Center where terns formerly nested, the vegetation could be removed and future vegetation controlled. The highly successful colony at Boyce Island (MM 108) was created by the USACE while dredging and would greatly benefit from depositing more dredge material followed by occasional vegetative control measures. This location and perhaps others might benefit by placing a wing like dike into the river to encourage separation from the bank. Many other least tern nesting sites could benefit from any of several management opportunities that are now being discussed by organizations that have control over the river.

North American Migration Count for 2009

By Hubert Hervey

Sixteen Bird Study Group Members enjoyed good birding during the annual NAMC held on May 9, 2009. After a tiring day of birding many of us gathered at the home of Ann and Larry Raymond where we enjoyed their hospitality and feasted. A fast recovery was the end result after a satisfying day. We had managed to locate a very high 154 species; not quite a record but respectable. We also counted 13,792 individual birds.

The communal nesting species led with: Cattle Egret 3,699, Dickcissel 1,346, Cliff Swallow 1,213 and Red-winged Blackbird 831. Northern Mockingbird and Northern Cardinal followed next but far behind.

We had some new participants this year: Steve Bankston, Jerome Lewis, and Ronnie Maum. You guys made up for the absence of a couple of our expert birders who were out of pocket. I hope you can become NAMC regulars.

Birds worthy of mention are: Tri-colored Heron, Black-crowned Night-heron, Sora, Western Kingbird (now regular breeders), Gray-cheeked and Swainson's Thrush, Worm-eating Warbler, Scarlet Tanager, Yellow-headed Blackbird, and Great-tailed Grackle.

New birds were: White-fronted Goose, Purple Gallinule, Hudsonian Godwit, and Olive-sided Flycatcher. Congratulations to the birders finding any of these birds including; Terry Davis, Jim Ingold, and Bobbie Womack.

Minutes of the Regular Meeting
May 12, 2009, 6:30 p.m.
Science Lecture Hall at LSUS

Nancy Newfield from New Orleans presented the program "Confessions of an obsessed hummingbirder." This presentation was held in the LSUS Science Lecture Hall because of the large crowd that the program was expected to draw. Also, there was no business meeting conducted.

BIRD REPORT – compiled May 27, 2009

Use the bird report to see what other birders have been seeing and where to go find the bird you want to see. Observers are abbreviated by the first and last initials. Dates and localities of observations are summarized under the observer's initials. Sightings are arranged by species. Following each species is a line of data in the following format: date, initials of the observer, number of birds observed, initials of another observer, number of birds they observed, etc. For the number of birds observed, a 1 is used for both 1 bird and for numbers not reported by the observer. For example: 01/12/99 BB 2 means that on January 12, 1999, BB saw two birds. Then by looking on the observer list, located after the sightings, you can determine that BB is Bob Birder and on 1/12/99 he was birding C. Bickham Dickson Park.

Report bird records for the newsletter to Mac Hardy by the 15th of each month. All bird records reported here are observations of the observers and are therefore the responsibility of the observer.
