Next Meeting-February 14, 2006

The Louisiana Bird Resource Center

by Richard Gibbons

FEBRUARY PROGRAM

When: Tuesday, February 14, 6:30 p.m.
Where: LSU in Shreveport, Museum of Life Sciences

An overview of the Louisiana Bird Resource Center in Baton Rouge will be given by Richard Gibbons. Richard's educational background includes a Biology Bachelor's degree from Centenary College of Louisiana and a Biological Sciences Master's degree from Texas A&M-Corpus Christi. For his Master's project he investigated the wintering abundance and habitat preferences of seven species of surface-diving waterbirds in a Texas estuary. Richard has worked as a field biologist for the past ten years in various parts of the Americas on projects investigating avian productivity and survivorship, Andean hummingbirds, hawk migration, and Texas colonial waterbirds. Richard is currently the Director of the Louisiana Bird Resource Center

PLEASE NOTE:

The monthly BSG meetings' speaker will now begin at 6:30 p.m. The meeting will conclude at approximately 8:00 p.m. Refreshments will be available before and after the meeting.

UPCOMING FIELD TRIPS AND EVENTS

Beginning birders are welcome on all field trips. Membership in the BSG is encouraged but not required for participation in field trips.

DICKSON DEER FARM BIRD BANDING

Saturday, February 11, 2006, 7:30 a.m.

GREAT BACKYARD BIRD COUNT

Friday, February 17 – Monday, February 20, 2006

CHENEYVILLE – SANDHILL CRANES

Saturday, February 25, 2006, 7:00 a.m.

BAYOU PIERRE WMA DESOTO PARISH UNIT DUCKS AND OWLS

Saturday, March 11, 2006, 3:00 p.m.

UPCOMING FIELD TRIPS AND EVENTS

by Nancy Menasco

Beginning birders are welcome on all field trips. Membership in the BSG is encouraged but is not required for participation in field trips. Field trips will **LEAVE** the designated meeting place at the time posted for each field trip. Plan to arrive early for field trip orientation and any carpooling/caravanning arrangements.

What to bring on field trips: binoculars, two-way radios, scope, if you have one, snacks, and drinks. Unless otherwise noted, field trips will take place rain or shine, so bring rain gear if the weather's threatening.

DICKSON DEER FARM BIRD BANDING

Saturday, February 11, 2006, 7:30 a.m.

Trip Leaders – Paul Dickson, 798-1000,
Paul@morrisdickson.com;

Jim Ingold, 797-5236 (W), 742-5067 (H),
jgold@lsus.edu

Directions: Meet at Deer Farm on Leonard Road between LA 1 and Ellerbe Road, entrance is on the south side of the road just east of the hills. Come and go as you like.

GREAT BACKYARD BIRD COUNT

Friday, February 17 – Monday, February 20, 2006

Compiler – Cornell Laboratory of Ornithology/National Audubon Society

www.birdsource.org/gbbc

BSG Coordinator – Nancy Menasco, 868-3255,
nmcpa@aol.com

This year marks the ninth Great Backyard Bird Count (GBBC). The count has expanded past the backyard to include anywhere you choose to bird. The BSG has enthusiastically participated in this annual event over the past several years and we hope that all of you will consider getting involved this year.

As in prior years, I will check the GBBC website regularly during the count weekend for BSG area species that have been reported. I will post our progress and missing species to the Bird Alert. If you are participating, you might consider posting the areas you're birding to the Bird Alert as well. The BSG is planning a mid-count strategic planning meeting on Saturday or Sunday during the GBBC weekend. The time and place will be posted to the Bird Alert. If you're not signed up for the Bird Alert service, you may sign up by emailing BirdAlert@birdstudygroup.org.

The BSG database lists 176 species that have been found in our area in the month of February, including rarities. Download a February (or any other monthly) checklist from the BSG website at <http://www.birdstudygroup.org/SelectMoCheck.html>. Start scouting your areas now!

For the first year, awards will be given to localities with the highest number of species, the highest number of birds sighted, and the most checklists submitted. There is also a photo contest. Complete instructions for participation are available on the GBBC website, but the guidelines are simple: For each day of the count period, report the highest number of a particular species recorded at each location you bird. For example, on day one of the count, in your backyard you have one **Northern Cardinal** at 10:00 a.m., five at noon, and two at 2:00 p.m. You report five **Northern Cardinals** for your backyard (the highest number present at one time) for day one. You go birding the same day at Richard Fleming Park, where you spot six cardinals in one location. You report six **Northern Cardinals** for Richard Fleming Park. You start all over again for days two, three, and four.

To learn more about the count and to enter your reports, go to www.birdsource.org/gbbc. Record entry is a simple process. The following instructions are from the GBBC website. If you don't find a particular species listed on the GBBC checklist for Louisiana, you may need to click on "Show this checklist with rare species included" at the top of the checklist page.

At the end of the day go to "Submit your bird checklist" on our GBBC web site. Fill out the questions about your location, local habitat, and count duration. Then enter your high counts for each species sighted on that day and location. You can submit one bird checklist

for each day that you count or for each new area that you count in. For example: If you count on four days at one location, you'd submit four different checklists or if you count on four days at two different locations each day, submit eight checklists, and so on.

Note: If you do not have access to the internet, call in your list to me or mail it to 503 Haynes Avenue, Shreveport, LA 71105, and I will enter your sightings at the GBBC website. Be sure to include the city or zip code, habitat, and count duration for all sightings.

CHENEYVILLE – SANDHILL CRANES

Saturday, February 25, 2006, 7:00 a.m.

Trip Leader – Jim Ingold – 797-5236 (W), 742-5067 (H), jingold@lsus.edu

Meet at the LSUS Museum of Life Sciences. Tour the back roads of the Cheneyville-LeCompte area by car to see **Sandhill Cranes**, waterfowl, waders, and shorebirds wintering in the rice fields. Bring a lunch to eat in the car.

BAYOU PIERRE WMA DESOTO PARISH UNIT DUCKS AND OWLS

Saturday, March 11, 2006, 3:00 p.m.

Trip Leader – Hubert Hervey, 925-9249, hawkeyehub@aol.com

Meet in the southwest corner of the Home Depot parking lot on Bert Kouns Loop at I-49. Note the afternoon starting time. You may have seen Hubert's posts about this area, which was the destination for one of the LOS field trips. Expect ducks and **Barred Owl** at the WMA, after which the trip will visit a couple of other locations to search for **Barn Owl**, **Eastern Screech-Owl**, and **Great Horned Owl**.

In Louisiana, unless you are under 16 or turned 60 before June 1, 2000, you must have a valid Wild Louisiana license or Louisiana hunting or fishing license issued by the Louisiana Department of Wildlife & Fisheries to enter a WMA (Wildlife Management Area). An annual Wild Louisiana license is \$5.00 for both residents and non-residents; a one-day pass is \$2.00.

Where to purchase licenses:

- Most sporting goods stores
- Call 1-888/765-2602 and charge it to Master Card or Visa; you will receive an authorization number to use until you receive your license. A convenience fee will be charged.
- Online through the Louisiana Department of Wildlife & Fisheries license sales website at www.greatlodge.com/power/IPOS/ipos_cust_search.cgi?stype=inet&st=LA&btype=Licensing. A convenience fee will be charged.

WILD BIRD CENTER EVENTS

Beginner Bird Walks

Saturday, February 4 and 18, 2006, 8:00-10:00 a.m.

The Wild Bird Center conducts field trips the first and third Saturday of every month, weather permitting. Meet at the store in the University Place Shopping Center (also known as the Target Shopping Center) at the corner of Youree Drive and East 70th Street. Destinations vary according to local sightings and may include local parks, country roads, or a great backyard. Loaner binoculars are available.

Where the Wind Comes Sweepin' Down the Plain

by Nancy Menasco

These lyrics from the Rodgers and Hammerstein song, "Oklahoma," proved especially appropriate to the Bird Study Group post-Thanksgiving trip to the plains region of northern Texas and southwestern Oklahoma. The winds seem to gather strength as they blow seemingly uninhibited over the southern Great Plains into Oklahoma and Texas. But when we arrived in Wichita Falls, Texas, the afternoon of Friday, November 25, 2006, the breeze was deceptively light. Amanda Crnkovic, Silviera Hunt, Jerry Bertrand and I had left Shreveport that morning in the hopes of seeing our primary target species, **Burrowing Owl**, before darkness fell.

As we neared Wichita Falls, the highway was lined with **Red-tailed Hawks**; it seemed that every post, large bush, and small tree had an occupant, sometimes two. After checking in at our hotel, we set off to meet James Burden, our host for the weekend. James, raconteur extraordinaire and the brother of LSU in Shreveport's own Dr. Beverly Burden, still lives in their hometown of Burkburnett, Texas, just north of Wichita Falls. Beverly was there visiting for the Thanksgiving holidays. Reaching Burkburnett, we crossed the Red River, which forms the border between Texas and Oklahoma, and met Kurt Meizenzahl at Randlett, only a few miles into Oklahoma across the river. Kurt, who was to be our birding guide on Saturday, is from Lawton, Oklahoma, and was joining us for our trip to a nearby prairie dog town on a ranch owned by friends of James.

As James had told me in an earlier conversation, "We are not going to look *for* **Burrowing Owls**; we are going to look *at* **Burrowing Owls**." We quickly learned that when James tells you you're going to see something, you'd best believe him. He was certainly true to his word in this instance; when we arrived at the small

prairie dog town, there were the owls, standing amongst the prairie dog burrows. Occasionally, one would fly low across the town and we saw at least three, possibly four, of the long-legged little owls, a life bird for Silviera, Jerry, and me. The numerous prairie dogs sitting or scurrying around the town were also lifers for us three. Amanda related an interesting, if not particularly appetizing, tidbit about the owls: **Burrowing Owls** will place dung next to the burrows to lure dung-eating beetles, which are then consumed by the owls.

James had not yet finished pulling owls out of his hat. At another ranch, a **Barn Owl** obligingly flew out of the barn (what else?), and as we toured the surrounding roads, at dusk, we found two **Great Horned Owls** perched in a tree.

Wichita Falls was our base, but most of our birding would be done in Oklahoma. Now we were eight as Mac and Marilyn Hardy had arrived in time for dinner Friday night before and Hubert and Pat Hervey had joined us Saturday morning. Early Saturday we met Kurt in Lawton. Our first stop was the Wichita Mountains National Wildlife Refuge, which adjoins the Fort Sill Military Reservation near Lawton.

The Wichita Mountains National Wildlife Refuge, which encompasses over 59,000 acres in Comanche County, was established in 1901 as a National Forest from land that was part of the Comanche-Kiowa-Apache Indian Reservation. In 1905 Theodore Roosevelt designated it the first of four National Game Preserves he would establish during his presidency, paving the way for its future as a National Wildlife Refuge. Today, the refuge is known for its herds of American bison or buffalo, Texas longhorn cattle, and Rocky Mountain elk, but there were no buffalo on the refuge in 1905. By 1900, of the 60 million buffalo that had once roamed the American plains, there were only 550 remaining in four small herds. Through the efforts of the American Bison Society and New York Zoological Society, 15 of the finest bison from the New York Zoological Park were donated to begin restocking the Wichita Mountains Preserve. In October of 1907, the heavily-crated bison arrived by train in the little town of Cache, Oklahoma, and were hauled by wagon the remaining 13 miles to the preserve.

The Texas longhorn was on the brink of extinction when, in 1927, a herd of 30 longhorns were transported to the refuge. These cattle had been selected as most true to the original longhorn in a U.S. Forest Service search that covered 5,000 miles and included the inspection of 30,000 cattle. Since that time, the herd has been continuously culled and 80 additions have been

made, mostly from remote areas of Mexico and other longhorn herds, to maintain this true type.

Over the years, other species have been reintroduced to the refuge. The subspecies of elk indigenous to the refuge had been exterminated by the late 1800's; all the elk on the refuge today are descended from 20 Rocky Mountain elk and one elk of unknown origin brought to the refuge between 1908 and 1912. Prairie dogs, **Burrowing Owls**, and river otters are fairly recent additions. Only species native to the Wichita Mountains are part of the restoration effort.

On the refuge at Quanah Parker Lake, created in 1936 by the damming of Quanah Creek, an uncommon **Common Loon** dove in the distance, while **Canvasback**, **Bufflehead**, **Gadwall**, and **Northern Shoveler** floated nearer to us. The lake was named for the last great Comanche chief, Quanah Parker (c. 1845-1911), who was chief of the Quahadi (also called the Quohadah or Kwahada) Comanche. Never defeated by the U.S. Army, Quanah chose to lead his people, the last free Indians on the southern plains, to reservation in 1875. The loss of land and the decimation by buffalo hunters of the great buffalo herds, upon which the Comanche and other plains tribes depended, had left him virtually no choice if his people were to live. Eventually named chief of all the Comanche, he worked to promote self-reliance and self-sufficiency among his people. In 1907 Quanah was present to meet the train from New York that brought buffalo back to the refuge lands. At the death of Quanah Parker, in honor of this great warrior, statesman, and peacemaker, it was decided that henceforward the Comanche would use the title of Chairman instead of Chief for their leaders.

The Wichita Mountains range is a very ancient one; the mountains are weathered by millions of years of erosion and rise from the prairie like domes. Along the Scenic Highway, which passes by Quanah Parker Lake, the mountains are surrounded by an expansive flat area. As we walked, flocks of **Chestnut-collared Longspur** rose from the ground and circled around us to land again some distance away. Both **Eastern** and **Western Meadowlarks** sang around us.

In the small but beautiful canyon behind the Quanah Parker Lake dam, a **Canyon Wren** sang vigorously from a rocky outcropping. Not to be outdone, a **Rock Wren** hopped around on the rocks below. A walkway, reached by a series of steps on both sides of the canyon, crosses the canyon along the top of the dam. Jerry followed a trail that eventually leads up Little Baldy Mountain; not far above the dam, he found a **Rufous-crowned Sparrow**. A couple of these sparrows finally perched at the foot of a railing along the dam for the rest of us to see.

After a stop at the refuge's impressive visitor center and lunch at Meers Restaurant, noted for its giant hamburgers made from longhorn beef, we drove back through the refuge, stopping at a sizeable prairie dog town. There were no owls here at this time; interestingly, the refuge's **Burrowing Owls** vacate the towns for the winter whereas the owls at the town we visited with James Burden only about 40 miles to the south are year-round residents.

By early afternoon, the winds were indeed sweeping down the plain. On the way to our next destination, we explored several back roads to the west in Kiowa County. Along these roads, we found several **Red-tailed Hawks** demonstrating why they are called "Wind Masters," but **Northern Harriers** and even **American Kestrels** were braving the wind as well. A **Rough-legged Hawk** sailing in the wind was the icing on the cake.

We reached Hackberry Flats Wildlife Management Area near Frederick, Oklahoma, in Tillman County, in mid-afternoon. Restoration of Hackberry Flat, once one of the largest isolated wetlands in Oklahoma, began in 1993. Settlers, hoping to farm the area, drained it in the early 1900's by means of a four-mile ditch dug using horse and sled and later steam shovel. Although rich and fertile, the land proved unsuitable for agriculture due to periodic flooding. The restored area extends over 7,000 acres and a series of almost 30 miles of levees, ditches, and water control gates are used to flood and drain units to provide suitable habitat for all types of wetland species.

As we were standing on an observation platform overlooking the wetlands, holding on for dear life, I asked Kurt, "Does the wind always blow like this?" "No," he said, "sometimes it's worse." The reward for our perseverance was the multitude of geese, ducks, **American White Pelicans**, and even a few **Sandhill Cranes** spread out before us. In another unit, a **Merlin** rocketed past us and, in still another, a **Marsh Wren** sang for several minutes in the reeds inches away from us, but only Jerry caught a brief look at it.

We returned to Burkburnett to a smoked brisket dinner that James had prepared in our absence. Beverly had told me that James's briskets are legendary and we understood why after partaking of that dinner. I'd go back just for the brisket.

On Sunday morning, we visited James's land, 400 acres of old growth bottomland hardwoods, bordered by the Red River and an old oxbow of the Red. The salt cedars, the primary tree on the property, are twisted as if they had been buffeted by centuries of winds. The land was once an island in the Red River and part of it is still subject to periodic inundation. It is on the southern side

of the river, but is considered to be in Oklahoma for some purposes and in Texas for others. James is an excellent steward of the land, which he has owned for several years now. **Wild Turkey**, the Rio Grande variety, and **Northern Bobwhite** can both be found there. We were not able to do the property justice though as winds gusting up to 35 mph kept many of the birds low and out of our sight. Before the wind and hunger drove us to shelter as well, we did see both yellow-shafted and red-shafted varieties of **Northern Flicker**, **Sandhill Crane**, and a flock of five **Harris's Sparrows**, more than most of us had ever seen at one time and a special bird for Hubert and Pat, who host one or more every winter at their farm in Stonewall, Louisiana.

James left us to bird while he went to tend some cows and called us on the radio to tell us he'd seen a **Prairie Falcon** at the entrance to his land. He saw it again later on but we missed it both times. Knowing that was a species I especially wanted to see, he has called me twice since my return to Shreveport to tell me, "I'm looking at your **Prairie Falcon**." Obviously, we'll have to go back, for the birding, the brisket, and most of all, for the hospitality!

Call for BSG 2005 Birding Competition Entries

by Nancy Menasco

Turn in your records for the 2005 competition to Jim Ingold at jingold@lsus.edu by February 17, 2006. Please specify which competition you are entering; you may turn in entries for any or all of the competitions. The winners will be announced in the March newsletter. The eight parishes in the BSG area are Bienville, Bossier, Caddo, Claiborne, DeSoto, Natchitoches, Red River, and Webster.

Parish List Competition – There are eight individual parish competitions with the winner in each parish being the birder with the highest number of species in that parish and an overall competition with the winner being the birder with the highest total number of species for all parishes. Here's how this works: Let's say you had ten species in each of the eight parishes; then your total overall species count for the competition is 80 species. You could have the same ten species in all eight parishes or ten different species in each parish; your overall total is still 80 species. **What to report: The number of species in each parish and your overall total.** *Award:* An impressive certificate and the honor and glory of having your name published as a winner in the BSG newsletter.

Life List Competition – Geared toward new birders, the winner of this competition will be the birder who reported the most additions to his or her world life list in the eight-parish northwestern Louisiana area. Note that these must be additions to your world life list not just your northwestern Louisiana life list. For example, you saw a **Bewick's Wren** in the San Antonio, Texas, area last year. This year in Caddo Parish, you spot the first **Bewick's Wren** you have ever seen in northwestern Louisiana. Even though this is a first for you for northwestern Louisiana, it is not an addition to your life list, so it does not count in the BSG life list competition. Here's another example: You travel to Cameron Parish for the LOS spring meeting where you add **Reddish Egret** to your life list. Although this is an addition to your world life list, you did not see it in one of the eight northwestern Louisiana parishes listed above; therefore, it does not count for the BSG competition. Here's a final example: While birding at Walter B. Jacobs Memorial Nature Park, you spot a **Red-breasted Nuthatch**. This is a life bird for you. Congratulations, this bird does count for the BSG life list competition. **What to report: The total number of additions to your world life list during 2005 that were first seen or heard by you in the BSG area.** Award: Your choice of one of the following: *Sibley's Guide to Birds*, Peterson Field Guides "Birding by Ear" or "More Birding by Ear" CD, or Thayer Birding Software/Cornell Lab of Ornithology "Birds of Louisiana" CD.

"Golden Bird" Competition – This contest is modeled on The Big Sit! The Golden Bird Competition is for gung-ho and casual birders alike. One species, the "Golden Bird," will be selected in a random drawing from the list of species reported by competitors in the eight-parish area in 2005. The names of all the birders who turned in this particular species will be included in a second drawing to determine the overall winner. **What to report: List of species observed in 2005 for each of the eight BSG northwestern Louisiana parishes.** Award: A contribution will be made in the name of the winner to the Louisiana birding or conservation association of the winner's choice. Examples of possible recipients include the LOS, The Nature Conservancy of Louisiana, the Red River Refuge Alliance, or the Cameron Parish sanctuaries fund of the Baton Rouge Audubon Society.

MINUTES OF THE BOARD MEETING

January 3, 2006

Museum of Life Sciences at LSUS

Board members participating in the meeting were Ron Martin, Susan Martin, Jeff Trahan, Jean Trahan,

Nancy Menasco, Lily Poole, Michele Andrews, and Mac Hardy. Also present were Jim Ingold and Jerry Menasco.

Treasurer's Report – Jean Trahan will make a report in the next newsletter.

Twentieth Anniversary -- Nancy Menasco has ordered patches and is expecting a proof copy soon. She ordered 200 patches at \$1.70 each which is a total of \$340.00. Tax and shipping will in addition to this amount.

LOS Winter Meeting – Nancy Menasco reported that the LOS newsletter containing the meeting information will not be mailed until the middle of January. Details of the meeting are in the current BSG newsletter. Nancy knows of at least 40 people who will be attending the meeting. Irregular mail service in south Louisiana has been causing problems. She reported that there are eight field trips Saturday morning, seven Saturday afternoon and eight on Sunday morning.

Membership Email List – Mac Hardy has an email list of about 75% of all members. He will test it soon. Lily Poole suggested that we put a notice in the newsletter explaining why we need the email addresses and how they will be used.

Field Trips – Mac Hardy said that Brad McPherson has a farm in Nicaragua and Mac wants to set up a field trip to go there. Brad has offered to come to the next meeting to discuss this. The board agreed that we should have Brad come and talk. Nancy Menasco reported that the Great Backyard Bird Count will take place February 17-20.

Birding Competitions – It was noted that we need a deadline to turn in data for the 2005 bird competition and we also need a volunteer to collect the data. Jim Ingold volunteered to collect the data and the board set a deadline of February 17th. Nancy Menasco moved that we make some of the competitions permanent, but the board did not vote on the proposal.

Spotting Scope for Sale

60-mm Bushnell Sportsman, 20x & 40x lens,

Leitz tripod, all for \$150.

Seller will donate 20% to BSG.

Call Robert Lance, 965-9144

Minutes of the Regular Meeting**January 10, 2005, 6:30 p.m.,****Museum of Life Sciences at LSU**

Program – Vic Bogosian spoke about his activities with birds, turtles and snakes. After the program, Brad McPherson talked about his farm in Nicaragua and invited club members to visit. People visiting have to provide their own transportation and will be charged a fee of \$15.00 per day.

LOS Winter Meeting – Nancy Menasco encouraged everyone to register early for the meeting. The hospitality committee asked everyone to bake cookies for refreshments. Nancy said that she still needs leaders for several field trips. She said that club will order t-shirts with the club logo on them, but we have yet to choose the colors we want to order.

Bird Talk – Larry Raymond got a phone call from a person who said that he has an **American Woodcock** visiting his feeder. Roy Bott reported that he has a **Brown Creeper** eating at his suet feeder. Hubert Hervey counts 100 to 200 **Wood Ducks** flying over his house every day. Terry Davis reported a flock of about 100 **Lapland Longspurs** at Clark's Marina in Bossier Parish. A trip to Yearwood Road produced a **Palm Warbler** and more than 100 **White-crowned Sparrows** for Nancy Menasco

Field Trips – Nancy Menasco said that the Great Backyard Bird Count will take place February 17-20.

Birding Competition – The 2005 club birding competition is over. Jim Ingold will be the compiler for the BSG eight parish area. Club members should turn in their lists by February 17 to Jim.

Thanks to all of you who worked on a committee, led or assisted with a field trip, baked cookies, or just generally made our out-of-town visitors feel welcome, the Louisiana Ornithological Society meeting hosted by the Bird Study Group Friday, January 27, through Sunday, January 29, was an unqualified success. A total

of **XXX** birders attended the meeting. The BSG received many compliments from participants and everyone seemed to have a good time despite Saturday afternoon's deluge. Pat yourselves on the back for a job well done!

Bird count for the weekend = 133 species

Greater White-fronted Goose	Red-shouldered Hawk	Couch's Kingbird	Pine Warbler
Snow Goose	Red-tailed Hawk	Loggerhead Shrike	Palm Warbler
Canada Goose	American Kestrel	Blue Jay	Common Yellowthroat
Wood Duck	Merlin	American Crow	Spotted Towhee
Gadwall	Sora	Fish Crow	Eastern Towhee
American Wigeon	Common Moorhen	Horned Lark	Chipping Sparrow
Mallard	American Coot	Purple Martin	Field Sparrow
Blue-winged Teal	Killdeer	Tree Swallow	Vesper Sparrow
Northern Shoveler	Greater Yellowlegs	Carolina Chickadee	Savannah Sparrow
Northern Pintail	Lesser Yellowlegs	Tufted Titmouse	Henslow's Sparrow
Green-winged Teal	Spotted Sandpiper	White-breasted Nuthatch	Le Conte's Sparrow
Canvasback	Least Sandpiper	Brown-headed Nuthatch	Fox Sparrow
Redhead	Wilson's Snipe	Brown Creeper	Song Sparrow
Ring-necked Duck	American Woodcock	Carolina Wren	Swamp Sparrow
Lesser Scaup	Bonaparte's Gull	Bewick's Wren	White-throated Sparrow
Bufflehead	Ring-billed Gull	House Wren	Harris's Sparrow
Hooded Merganser	Forster's Tern	Winter Wren	White-crowned Sparrow
Ruddy Duck	Rock Pigeon	Sedge Wren	Dark-eyed Junco
Common Loon	Eurasian Collared-Dove	Marsh Wren	Smith's Longspur
Pied-billed Grebe	Mourning Dove	Golden-crowned Kinglet	Northern Cardinal
American White Pelican	Inca Dove	Ruby-crowned Kinglet	Red-winged Blackbird
Double-crested Cormorant	Barn Owl	Blue-gray Gnatcatcher	Eastern Meadowlark
Great Blue Heron	Eastern Screech-Owl	Eastern Bluebird	Western Meadowlark
Great Egret	Great Horned Owl	Hermit Thrush	Rusty Blackbird
Snowy Egret	Barred Owl	American Robin	Brewer's Blackbird
Black-crowned Night-Heron	Belted Kingfisher	Gray Catbird	Common Grackle
White Ibis	Red-headed Woodpecker	Northern Mockingbird	Brown-headed Cowbird
Black Vulture	Red-bellied Woodpecker	Brown Thrasher	Purple Finch
Turkey Vulture	Yellow-bellied Sapsucker	European Starling	House Finch
Osprey	Downy Woodpecker	American Pipit	American Goldfinch
Bald Eagle	Hairy Woodpecker	Sprague's Pipit	House Sparrow
Northern Harrier	Northern Flicker	Cedar Waxwing	
Sharp-shinned Hawk	Pileated Woodpecker	Orange-crowned Warbler	
Cooper's Hawk	Eastern Phoebe	Yellow-rumped Warbler

BIRD REPORT – *compiled February 3, 2005*

Use the bird report to see what other birders have been seeing and where to go find the bird you want to see. Observers are abbreviated by the first and last initials. Dates and localities of observations are summarized under the observer's initials. Sightings are arranged by species. Following each species is a line of data in the following format: date, initials of the observer, number of birds observed, initials of another observer, number of birds they observed, etc. For the number of birds observed, a 1 is used for both 1 bird and for numbers not reported by the observer. For example: 01/12/99 BB 2 means that on January 12, 1999, BB saw two birds. Then by looking on the observer list, located after the sightings, you can determine that BB is Bob Birder and on 1/12/99 he was birding C. Bickham Dickson Park.

Report bird records for the newsletter to Mac Hardy by the 15th of each month. All bird records reported here are observations of the observers and are therefore the responsibility of the observer.
